Hidden Room:

On the level Bad Diplomacy get to the second floor and go right when you get off the lift. Go to the very end point and you will find a door. When you try to open it you should find it's locked. Put on your Q-Specs. Now look left and you'll find a hidden door open it and inside is Armour and Ammo.

Various point multipliers:

To get the most out of the points allocated at the end of the levels try using these helpful hints.

"The night of the jackal" - when the jackal is standing in front of the crane once she is nearly dead, go to the right hand side of the room and press the green flashing button this knocks her into the big vat of hot stuff and kills her without wasting ammo and health.

"Oilrig" - On this level after you have finished of the men next to the helipad go into the lab and use the "Q-Remote" on the flashing green computer, now you can control

ANY crane on the level. the first crane, outside the lab will drop a crate containing grenades, the second and third crane, accessible through a secret vent , this is at the second meeting with the boss guy, go left and use the laser on the vent, crawl through and open the big shutter door, then us the remote on the cranes and jump across the boxes untill you reach the land, then you can pick off the enemies more easily and avoid that sniper ! this also improves your points at the end of the level

"The Night of the Jackal" - when trying to reach the apartment use the Q-Claw to reach up onto the snipers balcony pick up his gun and this provies something to snipe men with and gives you a bonus points at the end of the level.

Get An Easy Bond Move:

Repeat this procedure until he is defeated.

Alternatively, after clearing out some of the numerous bombers climb t to the highest elevation possible. When you fighter is above the Boss on your radar, dive down and wait until your fighter is locked on the Boss. Fire the missiles and go through the Boss. Your fighter should explode. When the game restarts the Boss will still have the damage inflicted by your attack. Repeat the steps until the Boss is defeated.

Easy multi-player kills:

Select the F-15 (if available) in multi-player mode. Use the special weapon as soon as the dogfight begins. This should completely destroy your opponents in one shot. For a better chance, place enable infinite specials in the settings.

Human Plus

Drop to -50000 credits and an experiment will be done on you. You need to do this multiple times to get the full benefit. This will restart the game.

1st time: Automatic Radar

2nd time: Ability To Throw The Laserblade

3rd time: Have Heat Taken Away From Attack

4th time: Ability To Walk While Shooting Back Weapons

5th time: Use Half Of The Energy

6th time: Double energy

Steal Your Enemies Emblem

In the single player Arena mode you can steal your defeated opponent's emblem. To do this you of course have to beat an opponent in the Arena, then once beaten you can go back to the opponent selection screen where everyone is ranked by number. Highlight and select someone you have defeated and then press START + SELECT and you should hear a sound. Press the two buttons again and again until you hear the sound. Once you hear the sound go to the Edit Emblem screen and the emblem selected will be the one you just took from your opponent. You can then edit it or just wear it as your own.

Use overweight AC Units

Once you finish the entire game the first time and you see the credits, the next time you start a game using the final save (the one you make after the credits) you can buy equipment and parts that would normally make your mech overweight. You will then be able to use your overweight mech the next time you play.

Debt of 50000:

You have to go in debt of 50000 six times to unlock these cheats:

1. Automatic radar
2. Ability to throw laserblade
3. nothing that i know of

4. shoot back weapons while walking
5. nothing that i know of
6. double energy

Easy way to win in arena:

If you are having a lot of difficulty in the arena, there is an easy way to beat just about anybody. It helped me get all the way to rank 9. There is a level you can choose in which you start off on top of a tall building, if you just sit there, then the enemy usually flies out of the ring.

Secret Weapon:

The weapon is hidden in the mission against Emeraude to destroy the surface weapons. Right when the mission starts, fly over the surface weapons and look over to the rocks where there is a small hill. Somewhere around there lying down is the karasawa mk-II (the weapon one the AC has on the cover). Press circle to pick it up. This is a laser weapon that is extremely powerful with 50 ammo. I think it is one of the best weapons in the game.

Another way to win arena:

The way to do it is to buy the back part that shoots 2 multiple warhead missiles its expensive but you'll make it. Then go to the Etal Base and from the beginning fly to the platform all the way in the air and then there is a pole in the middle. Fly on top of that. That's all use the multiple warhead missile and no matter where he is they can track ure enemy.

In the single player Arena mode you can steal your defeated opponent's emblem. To do this you of course have to beat an opponent in the Arena, then once beaten you can go back to the opponent selection screen where everyone is ranked by number. Highlight and select someone you have defeated and then press START + SELECT and you should hear a sound. Press the two buttons again and again until you hear the sound. Once you hear the sound go to the Edit Emblem screen and the emblem selected will be the one you just took from your opponent. You can then edit it or just wear it as your own.

Staying alive:

Never stay still, even if you are trying to shoot someone or something. If you move around, it will be harder for the Tan army to hit you; same with the Bosses. If you miss an enemy, turn around and come back for another pass, but do not stay still. For heavy populated areas, go forward but weave left and right as you do so. This will help keep you alive until the next health bag.

Weapons:

Try to get the Bazooka and the Flamethrower's power to maximum. Use the Bazooka as your main weapon. It can blow up obstacles as well as cause heavy damage. If you find yourself unable to kill an enemy near you, you can quickly change to the Flamethrower and melt them, then change back to the Bazooka.

Sink the Shark Submarine:

You must sink the Shark Submarine at the end of level 2. First, kill all the tan soldiers that appear. Hold L1 and press the Right Analog-stick to aim for the gun turrets on top of the submarine. Destroy the turrets to sink it.

Keep transporting between the Tavern and the gauntlet until you reach whatever level you want. Once you gain enough levels you could probably make it all the way to the end where an Iron Golem is waiting for you. Enjoy.

- 5- Import Drizzt into a new game.

Defeat Sarafan easily:

To defeat the Sarafan Lord easily, in chapter 11, do the following:

Like all bosses, he has 3 battle tactics. In the first, You must dodge his 3 energy blasts from the Soul Reaver. As he is charging for his second onslaught, you must quickly hit him with Telekensis. He is then stunned, you use the jump ability to attack him. This will instantly cause a cut scene and you will be thrown into his second tactic.

His second form is fairly easy. You simply block all his attacks, other than his fury hit (just jump out of the way from the fury hit), continue to block until Rage bar is filled enough to use Immolate. Repeat this process about 4 times, this will cause another cut scene and throw you into the 3rd, and final tactic. (you now have the soul reaver! =))

The 3rd tactic is fairly difficult. As he blocks 90% of your swings, and all Rage attacks are futile. You do not have many options open. You must swing 3 times at him, he will block all 3. You then jump away backwards instantly after the 3rd swing, he will then attempt to hit you immediately after your 3rd swing. After he starts to pull his hand back from the attack, you slash at him with the Soul Reaver. You should hit him at least once during this proces. I'm sorry if it sounds confusing, but this tactic does effectily.

Easier way to defeat Sarafan Lord:

Ok the cheat that tells you to do all of that confusing tactics on the 3rd time you fight the Sarafan Lord theres an easier way hes right about the first two but on the 3rd heres what you do. You can use one rage technique its the first one you have in the game "Rage" okay block all his attacks until the last attack where he puts his hand anove his head about to smash you quickly slide to the side with your rage bar full and use it right after he swings at where you were standing this strategy worked great for

me the first time I fought him good luck!

Cannon Fodder PS2 cheats

- [PS2 Games - Half Price](#) -

[Return to Main Index Page](#)

Try this : On the map, type [Ctrl]+FODDER, then [Enter] to get to the next level.

Use the same techniques as used in the Cannon Fodder 1, as this game is basically the same but with a variety of scenery.

Watch out for the flying debris that the buildings release when you grenade them.

Booby Traps:

Watch out for piles of rocks or ruffles of grass, as these often conceal mines. Shoot them and you'll be safe to pass.

Trip wires are also dotted about some levels, these are also easy to see. They look like a silver or black line stretch across a walkway. To disarm them, simply fire at the area around them.

Mission 2 Phase 1:

Head to the top right and collect the grenades, then down the right hand side for more, before you kill all the men.

Mission 2 Phase 2:

Conquer this phase in an anti-clockwise direction, but do it slowly as you will encounter a very large amount of enemy soldiers. There is a building at the top of the right hand side but don't blow it up until you have collected the grenades.

Mission 3 Phase 2:

Look out for the rockets, to avoid simply stop and when a rocket has been launched at you make a moving attack. Some grenades can be found at the left hand side of the tent, up the top if the level. To save on men blow it up, unless you are short on grenades, then you'll have to collect it.

More hints (I hope) in a future issue of the mag. Anybody completing the game with ease, please write Cheat Sheets some hints on how you

did it.....

BLOW UP TANKS WITH C-4!!!:

When you have to blow up a tank and you dont have any rocket launchers, take your C-4 and have it out then have another team member, or you, throw a smoke bomb right next to it then the person with the C-4 runs to the tank and you have to get all the way against it then crouch down and and face it put one piece of C-4 on it then throw another smoke bomb and when it covers the tank or makes it so it cant see then get on your feet and run back to your team members then detonate the C-4.

Where to get the C4:

Right after you cross the bridge there's two buildings and one of them have the C4 It is the one on the left go in there and collect the C4 . Extra Life:

When you are in the first level, Arctic Antics , At the end of the level, there is a mammoth up on a cliff. Jump onto the furry rascal and you will get an extra life.

Easy Lives:

To get easy lives, you must have beaten the fourth boss and have the bazooka. Then go to level 1. Around the place are those big elephants. Shoot them. There are three elephants. For each time you kill one, you gain 1 life. A better way, is to shoot the elephants, go to the beginning of the level, die, then shoot them again.

Defeat N.Gin:

To defeat N.Gin, shoot at the flashing pads on his robot suit. Four of the pads on the first suit will fall off. The pad underneath his viewing area will not fall off: it will just stop flashing. The two easiest pads to hit are the ones that fire missiles, (the middle is also quite easy too), then his arms are the last two. When he brings up his arm, there will be a few seconds before he starts firing, so this is the best time to shoot at the end of his arms. When you have destroyed all the flashing pads, then he will get into another suit which is even harder.

This time, the flashing pads are four missile launchers, one on the far left, and one on the far right. The last one is just under N.Gin's ugly mug. Hit and destroy all these pads, and you have and apple bazooka!!!

Beat Ice Queen, get Moon Orb:

First hit with close range attacker (Toan,Goro) with fire based weapon. Then when her defenses are down attack with ruby (using a stamina potion) attack with the strongest ring with fire based element. Repeat this until you finish her off. She has 400 hp. After you beat her Rando comes and gives you the moon orb.

How to Beat the Dark Genie:

The Dark Genie has 3 phases. For the first phase you use either Toan or Ruby with their best weapons with the highest attribute in all the elements. Eventually two hands will pop out of the ground, when this happens look at the color of the hand and match an attribute with the color. Now, for phase two you should use Ruby with a weapon that has the Holy attribute. Also watch out for his cheap shots. Just make sure your health is over 60 when he does it. For phase three you should use Toan and attack the jewel in his mouth.

Unlock Level Demon Shaft:

Beat the game and this new world will be available on your map.

Defeating Master Utan:

First he will spit seeds at you that are hard to miss. To not get hit by them you should use Xiao and use your strongest slingshot, I prefer the Bandit slingshot. When he grabs an orange, switch to Xiao and shot him he will stop in his tracks and run around. Just do that every time he reaches for a tree.

Defeat Ice Queen with one person:

To defeat the Ice Queen with 1 person by 14 or 15 Fire gems and put them all in your inventory and just keep throwing them at her until she dies.

All Gems Status:

message: Garnet: AT=5 Fire=10 beast & rock=10

Sapphire: MP=10 wind=10 Flying=10

Pearl: Ed=10 Th=10 skull=10

Diamond: Plant, Beast, mimic, plant, etc. =5

Ruby: Sp=10 Fi=10 mimic=10

Emerald: Mp=10 Dino & plant=10

Aquamarine: Ice=10 Sea & Flying=10

Topaz: At=5 skull & Flying=10
Amethyst: Ice=10 Dino & Mage=10
Peridot: At=5 Ho=10 Plant & beast=10
Opal: Ed=10 Metal & Mage=10
Turquoise: Ice=10 Rock & Mimic=10

Sun Sword:

To get the powerful Sun Sword, complete Toto's house, which requires Toto, Golem, totam pole, and the handle. At the event, Golem will turn himself into the Sun Sword. After a couple of Synthespheres, the Sun Sword is unstoppable!

How to beat the King's Curse:

First, use Ungaga's whirlwind special to blow away the black. Then, use your strongest weapon for Toan and do a special attack. Repeat process. After you win, the temple will start collapsing and you will go through a difficult duel to get on the Moon Ship. Good Luck

Quick Weapon Upgrade:

In order to quickly upgrade your weapons without using power up powders and fighting enemies with your weak weapon (the one you want to upgrade) Simply kill the monster with your strongest weapon then right before the enemy vanishes switch to the weapon you want upgraded and the Abs will go to that weapon.

Lamb Sword's Secret Ability:

First you must get the Lamb Sword (the only way too get it is to build up the Wise Owl Sword).
Next you must get you WHP low, you will know it is low enough, because it will say at the bottom right corner, "The Lamb Sword got scared so it went into Wolf Mode" When it goes into that it raises its stats.

Note: It will go back to regular mode when you do an "Upgrade" or "Repair" it.

Hint: The Lamb Sword evolves into the Atlamillia Sword which evolves into the Chronicle Sword, the 2nd best sword in the game (The Chronicle 2 Sword which you find at the end of the Demon Shaft)

How to beat Joe in one hit:

First, you need the sun sword. Then, evolve it two stages to get Zeus's sword. Get the sword to full attack. Give yourself a stamina drink and put your sword on the highest element you have. Finally, give him a one-hit KO.

Get the ultimate sword:

After you beat the game the Demon Shaft opens up. The Demon Shaft is an incredible

hard dugeon. It has 100 levels and they get harder the farther you go. At the end you have to fight the black night but after you wound him a light shoot from the sky and kills him. From that light the Chronicle2 sword appears.

Tons of FREE Items:

This is done in Norune village. The first thing I can tell you (and this is really important in Norune) is to NEVER set up or finish Gaffer's Buggy until you're done with Norune Village. When you put it up, the mayor stops giving you items, and you'll need his items to get this to work.

As soon as you get the Hag's house finished, she will store items for you. About 60 in all, I think. The trick is to get the free items from the mayor, and then take them back to be stored. You can do this as much as you want, all the way up to 60 total items. Think about it...if you get 60 repair powders saved up, you can save a lot of money on supplies until much later in the game. This is completely worth restarting the game for, no matter where you are.

Get Music Box key:

You will need a music box key to fight the boss in "Shipwreck." To get the music box key, you'll need to complete the Cathedral, then go to the Divining House and ask the nice lady to tell you about the queen's lost lover. Then go to the the guy you meet at first when you come to Queens (don't remember the name). He won't be in his shop but there will be a key. That key will open the music box. If you want strategy to beat the ice queen boss, find it on this page.

How to catch the Maryan Garayan:

The first thing u need is a poison apple, use that as bait and fish at the water fall in Matataki Village during the night if u r successful then u should get the Maryan Gatyán and alot of fishing points.(u might have to wait a little while)

Maryan Garayan's Secret:

When you catch Maryan Garayan go to a chest protected by a trap. Try to guess the trap. It will say "Maryan Garayan shows the right path." and when you choose the trap the trap will be flashing red and have a picture of M.G. by it. Also I'm not sure about this: He might disable the trap directly.

Kill Statues Early in the Game:

You must have Xaio and a repair powder. First, find a statue. Then press O to lock on. Get a reasonable distance from it. And go rapid-fire.You will need to use a repaiir powder. !!YOU MUST USE XAIO!! Or just use a magical item.

Beat King's Curse w/1 person:

First you need a lot of repair powders if ungaga is weak, but if hes ok about 5-10 will do. Stay in one spot and he'll come at you and always keep his spinning thing on and he'll kill him eventually

NOTE: auto repairs are the best just line them up in your "active items" and if you have stamina drinks that works well.

Get the Chronicle Sword:

To get the Chronicle Sword first get the chopper dagger. Then upgrade into a gold dagger. I dont no the name. Then,upgrade it into the maneater. after upgrade it again into the Atlamillia Sword. then upgrade it one more time and you'll end up with the cronicle sword. it is the second best sword in the game! This sword will take a while to get.

7th Heaven Sword:

To get the extremely powerful 7th Heaven Sword you should start with the Serpent Sword, then upgrade it to the Evilcise Sword. After that upgrade it to the Drain Seeker Sword. Upgrade that to the Dark Cloud Sword. Finally you can upgrade it to the 7th Heaven Sword. The sword has a max attack power of 240, with End and Sp of 99, amd Mp of 110. It takes alot of work to get, but it's accomplished easily by going to the back levels of the dungeons.

Weapon upgrade:

When you upgrade your weapon you should go on customize before you upgrade it if you had any stuff in customize. If you brake your weapon it will disappear exped for the weapon that you start with. If you upgrade it alot it might turn into a different weapon if you go on buildup. If you go on status break it will break your weapon and turn into a ball and No More Weapon!

Free Big Bucks Hammer and Platinum Ring:

When building Queens whatever you do DON'T build Jack's store before you finish building King's Hideout. After building King's hideout and getting Ruby then you may finish building Jack's store. Once its done go to jack's store and an event will take place. You will then receive Big Bucks Hammer (1000 gilda) for Goro and a Platinum Ring (600 gilda) for Ruby for FREE.

Ultimate Dagger:

To get the ultimate dagger all u have to do is upgrade it to level 5. Then do status break. you'll get the synth sphere, and your dagger will still be there! Then all you have to do is put the sphere on the original dagger.

Tram Oil Heaven:

First of all, you must gain Ungaga as an ally. After you have him, you gotta get or build up to a Terra Sword. It seems that the Terra Sword has a bit of lucky magic in it. After that, go to the Divine Beast Cave and call forth on Ungaga while equipped with the Terra Sword on the either the first, second or third floor. Soon you'll be able to collect a lot of Tram Oils with just a few entries inside the cave. After you got all the tram oil you need, go to the back floors and keep collecting goods! (I got seven tram oils with just two entries inside the cave!)

No Antidotes?:

Well you may know that antidotes are hard to come by, this code is simple but valuable. If you get poisoned without a antidote drink but you do have a stamina drink, go into a nearby pool and drink the stamina drink, then wait until your stamina is gone and you're cured!

Collect the Alta Quickly:

First you must unlock all of the floors, territories, etc... don't collect the alta until you have unlocked all of the floors all the way to the boss room. before you fight the boss back track to all of the floors and collect the alta.

How to Beat Dran:

To beat Dran, use Toan and Xiao. First hit Dran in the air with Xiao when he is about to attack. Then switch to Toan and run up and hit him as many times as you can while he's on the ground. Keep repeating this until he collapses. (watch out for him when he attacks. he will shoot at the ground and make a hole. if you don't watch out where you're going, you'll loose some life.)

Catch Umadakara:

Go to the matataki village POND, and use a carrot for bait. It gives u quite a boost in ur fishing points. (i got a 104cm Umadakara and got 151 fishing points.)

Then after you got all the orbs press select then save your game, then reset. play that same level over and over and each time you save and rest, you save the number of orbs, so you can buy cool stuff. it is time consuming and its not helpful on your rank on that level but it does make the game alot easier to complete.

Beat Griffin:

The first time you fight the Griffin is in the open field near the three doors that are locked, two by shield and the other with spears. To beat him just use Air Raid. It gets the job done really quick. The second time you fight him you HAVE to use Air Raid, it was the only way i could beat him. And the last time you fight him is in a open space again.

Increase Your Jubbling

From the main menu select Options. Then, choose Game Settings then select Other. From there you can increase the "age" of your characters.

Survival Cheat

Select Survival mode from the Main menu. Once the Level has loaded and the fight has started press the eject on your PS2. The tray will slide out, but the fight will continue. Once you have "KOed" your opponent you can continue to beat him/her mercilessly. The PS2 cannot load the next opponent because you have ejected the disc. Do your ariel attack (UP + PUNCH + KICK). Every time you do this attack you will be rewarded with a bonus item. Continue to do this as long as you like. If you notice the picture below I was able to score over 1 million points with only one win. Once you have had enough of that particulay "opponent" you can simply push the disc tray back in to the PS2 and after about 10 seconds the music will start again the next opponent will appear. You can repeat this trick as many times as you need to. Survival mode should be no problem now.

Successfully complete the story mode with every character in the game on easy. You will be able to select Bayman on every mode of play except for Story Mode.

Difficulty Setting Trick:

This is a glitch that can come in handy. First, start a mission on expert difficulty. Next, save in the middle of a mission and then exit back to the title screen. Now, change the difficulty to novice. Do not load the save file with your current mission yet. Instead, start a new game, and then do a soft reset (press SELECT + START). Finally, load the save file with your current mission.

Now the game will still think your mission is on the expert difficulty, even though all the enemies will be set to the novice difficulty. This can make getting the 10th and 11th level weapons a lot easier.

Score tries from scrummages (scrums):

To score a try from a scrum is easy, although you need to be quite close to the oppositions' try-line respectively within the 22 metre line. Firstly feed the ball into the scrum like you would in a normal scrum. Then drive using the Circle button. Keep driving but do not hook the ball as this will turn it into free-play. When you get to the oppositions' try-line immediately press X to dive on the ball. You have now scored an easy try.

Eternal Ring PS2 cheats

[Return to Main Index Page](#)

Cheat mode:

Go to the title screen and press Circle, X, Triangle, Square, Square, Circle, Triangle.

The Secret Dungeon:

There is in the game a hidden dungeon divided into four Floors. To access this area, you have to possess a Dark or Light Magic Spell Ring. Then go to the beach where you start the game, go to the left and you'll find a door that is locked. Cast a Dark or Light Spell on the door, and it will open. Inside this dungeon, you'll find really tough monsters. Most of them will be able to kill you in one hit, so be very careful. Here are the reasons why you must visit this dungeon:

You'll get Lvl 5 Magical Stones of all kind.

You'll find Magic Rings (in the 3rd floor, there is a bird that give them infinitely).

You'll find Special Rings (including the Mirage Edge, that makes you hit 4 times instead of one).

You'll find the Eternal Sword (you have to kill a monster in the last floor to get it).

You'll gain tons of XP (big birds in 2nd floor are the best). - You'll be able to become almost invulnerable (see below).

To become invulnerable (any attack will have almost no effect on you), here is the trick. On the 4th floor, there are white crabs. Almost each time you kill them, they'll drop a Dragon Fang that will raise your stats (resist fire, resist ice...) by one. All you have to do is to kill all these crabs (using the Mirage Edge and the Eternal Sword is the easiest way). Then use all the Dragon's Fang, go to the 3rd floor and back to the 4th, and all the crabs are back... Keep doing that until all your stats reach 255, and you won't fear any monster.

A few hints: First, don't try to kill all the baddies, especially if it's the first time you enter the dungeon. Just run and try to find the teleporter to the next floor. Once you'll reach the 4th floor, you'll be safe because there are very few monsters there. You'll be able to kill them one by one. Start by killing the big monsters to get the Mirage Edge, then kill some crabs to make your character better. Then just go out and save your game. After that, go back to the 4th floor and try to get the Eternal Sword. Once you get it, go out and save again. Finally, go back to the 4th floor and kill crabs again to max out your stats. After reaching 255 in each stats, you won't die whatever happens, so just go to the 3rd floor and kill the big birds that are there. This will max out your XPs. After that, you can visit all the floors and make your collection of Magical Stones and Rings.

Hidden area:

Collect Dark Crystals during the game by killing various monsters. Go to a Save Crystal and enter the item screen. Use a Dark Crystal to go to the Shadow Tower.

Easy stat increase:

When playing as Sharline in the area before the research lab, find the Save Crystal under the cliff by Royal Commons. There is a plant creature that always gives you a Blue Fruit there. You can attain maximum stats early by killing the plant/monster, then go into the shop. After entering the shop, all enemies in the area are respawned.

When playing as for Sharline, in the middle of sky tower there is an icy area on the third floor near the elevator. One of the big pink guys is located here. Kill him and he will drop a red fruit. Each time you kill him, another one will appear. Kill him nine times, then return to the save crystal and return. Repeat this as needed.

When you begin your adventure as Darius, make your way to the first Save Crystal you find. When you go through the "stone doorway" that is next to it, a bee-type enemy will appear. Kill it, and it will drop a Blue Fruit. Blue Fruits give you 5 points to add to your stats. Return to the Save Crystal, then use it to enter the store. Walk out of the store, return to the bee, and kill it again. It should drop another Blue Fruit. Repeat this as many times as needed. This trick can be done wherever there is a Blue/Red Fruit near a Save Crystal.

Easy money:

While playing as Darius, in the shrine under the castle there is a Save Crystal. Continue down the walkway you will fight a giant stone monster. Go left or right from that room you can find as many as four of these opponents. There is a good chance that they will drop a Palmira Ore, which sells for 1,000. They also drop Red Fruits on occasion, which also makes this location a good place to increase Darius' stats and equipment levels.

Darkforge Armor:

In Darius's story, you have to fight a monster that appears in the cultivation room. After you defeat this monster, the ground begins to shake and you go to the

underground shrine. When enter, you will find a save crystal -- hopefully you have enough money to buy it. Enter the shop, go to the armor and purchase it. This is the best armor and greatly increases strength.

Defender Sword:

In Darius' story, when you get into the coliseum and defeat the Boss, he will slam his sword into the ground and cause an avalanche. This will cause both of you to plummet downward. When you get on your feet, turn around and you will see a sword on the floor. Pick it up. It is the Boss' Defender Sword that he dropped after the fall.

Degulta:

when you are transported to the coliseum in Darius's story, do not go inside yet. Instead, walk around the outside. You will encounter a monster with a Degulta. Defeat it to get it -- if you do not get it, you fought the wrong monster.

Heavenly Axe:

In Darius' story, when you get to the abandoned road and defeat Djin, a bridge will appear. Go across the bridge and follow the path. You will enter a room with Sienna. Do not talk to her yet. Instead, turn right and pick up the Heavenly Axe.

Easy win:

Choose a side to play on. Then, during gameplay, press Start and choose "Select Sides". Move your controller under the opponent's side and resume gameplay. Then, score as many goals as desired (while under the opponent's side), then just switch back to your side again. This way you will have a big point lead, depending on how many goals you scored. This trick also works better when you switch back to your side near the end of the second half.

Fancy footwork:

At any time during play, hold R2 and move the Right Analog-stick to execute moves. Side to side does a stepover, back pulls the ball back, and rotating it in a circle does a maradona.

Getting good players:

Go to the options menu then to "Player Swaps". Swap all the good players desired onto the team you want to play as, then save that as a squad. Call it whatever desired. Then go to "New Season" and select "Current Squads" and play your team. This is useful for a third division team. This team now has all the good players.

Buying players:

If you want to buy a player, bid for them about 1 or 2 million above the asking price. This ensures you of signing that player. Players that are worth buying include:

Thierry Henry
Ronaldinho
David Beckham
Ronaldo (either)
Tim Howard
Roberto Carlos
Alexandre Del Piero
David Bellion
Ruud Van Nistelrooy
Hernan Crespo

In the first year, it is almost impossible (unless you bid over 5 million above the asking price) to buy Thiery Henry, David Becham, Ronaldo, and Del Piero.

Recommended team:

Create a team with the following players.

Goalkeepers:

Tim Howard
Iker Casillas

Defenders:

Rio Ferdinand
Paulo Maldini
Alexandre Nesta
Roberto Carlos
Lilian Thuram
Sol Campbell

Midfielders:

David Beckham
Zinedine Zidane
Cristiano Ronaldo
Luis Figo
Ronaldinho
Edgar Davids
David Bellion

Forwards:

Thierry Henry
Ruud Van Nistelrooy
Ronaldo
Del Piero
Shevshenko
Adrian Mutu
Hernan Crespo

Create a team with the following players. Note: The players are expensive so you might have to sell some of your best players first. The subs are up to you.

Defenders:

RB: Michel Salgado (Real Madrid)
LCB: Fabio Cannavaro (Inter Milan)
RCB: Alessandro Nesta (AC Milan)
LB: Roberto Carlos (Real Madrid)

Midfielders:

LM: Zinedine Zidane (Real Madrid)
RM: David Beckham (Real Madrid)
CAM: Ronaldiniho (Barcelona)

Strikers:

LF: Ronaldo (Real Madrid)
RF: Theirry Henry (Arsenal)

Glitch: Ghost movement:

When you have won a game and a player sent off from the team you are controlling, you will see the ball move and go into a goal by itself.

Glitch: Missing replays:

When a goal is scored, sometimes the replay will show your own goal and the goalkeeper standing there, doing nothing, while the camera moves around.

Get Baralai's Sphere:

Baralai's Sphere can be found in Guadosalam beyond the locked door that everyone talks about. How do you do it? Examine the door in very Chapter. During Chapter 5, Tromell Guado will let you inside, if you were able to finish the mission on Mount Gagazet during Chapter 3.

Unlock Extra Ending:

First you'll have to meet with Maechen at Guadosalam in Chapter 3. You'll find him when you meet up with Logos and Ormi in the same area. Next you have to get the "whistling" scene with Yuna at the end of Chapter 3. When you're alone in the Farplane, move Yuna around and continually press the X button. You'll hear whistling. That means you have activated the event. Next thing you have to do is get an Episode Complete in Luca during Chapter 5. All you have to do there is visit the location where Tidus taught Yuna how to whistle. Next, get an Episode Complete in Besaid. Finally, once you have defeated Shuyin at the end of the game, keep tapping the X button to get your just rewards!

Easy Healing:

If you need to heal up, change your characters into White Mages, because they have the lowest HP in the game. You can use regular Potions or low level white magic spells to cure them. Revert them back to their original classes and they'll be at max health.

Good Level Up Spots:

Good places to level up during the game are the Leblanc Syndicate's headquarters early in the game, Cid's secret dungeon during Chapter 5 for mid level characters, and the Depths of the Farplane for high level characters.

Quick Fix:

If an enemy hits you with Stop, cast Haste or use a Chocobo feather on them. They'll be back to normal, and they will also have Haste cast on them.

Quick Kill:

Equip the Cat Nip accessory and use the Trigger Happy ability when the wearer of Cat Nip has their health below half. You know this happens when their HP indicator turns yellow. The Cat Nip accessory allows any item, attack or spell to deal 9999 damage no matter what the circumstances. Since Trigger Happy allows you anywhere from 10 - 20 hits depending on what level you have it at, you can pretty much kill any enemy in the game using this strategy. Just remember, enemies are also affected by this too!

Hint: Points Battle Tip:

Here's an easy way to beat those Points Battles. After you get the Undead Summoner at your school (in Nordagh), take him into every Points Battles match. While in the match, use his Death for Life ability and summon a skeleton. Once the skeleton is out, use the Undead Summoner's Life Steal ability on the skeleton that he has just summoned. Repeat this as much as possible and use the rest of your party for normal attacking. This not only keeps one person out of harm's way, but it also lets you build a good amount of points for your school without having to travel too far.

Hint: Ship Captain:

After arriving back in Imperia for the games in Caltha, there will be a Ship Captain located on the beaches. You can pay him a fee and he will take you back to the previous regions you have visited. This is the only way to return to these regions and complete any games that you did not earlier in the game. He appears at random times, so enter and exit Trikata until you see him. The fees are 20,000D for Nordagh, 20,000D for Steppes, and 15,000D for Expanse.

Repair any car for free:

Just bring your car back to your save place, park it in the garage and save your game. After saving go back to your car and it is fully repaired.

Advance to Staunton Island:

To advance from Portland to Staunton Island prematurely, go to the subway. The

subway should be closed off at the bottom of the stairs. Take a car down the stairs and either crash it or park it so the door is right next to the subway door. When you open the door to get out you will step out and through the closed off gate. Then go down to the subway and get on the train. It will take you to Staunton Island. It is tricky to get your car to land near the gate but it is possible.

Get into the Prison on Level 2:

On level 2 choose a really fast car (Farrier gt)(Cop Car) and drive as fast as possible down towards the bridge that leads to the prison, jump off the bridge at your top speed and veer towards the left, once you're on top of the wall jump out of your car real quick before it falls into the river. Follow the wall around to the left, you will see stairs leading down into the prison. (this will definitely take a few tries) but once inside I find it humorous to kill the unarmed prisoners.

Get free shot gun:

Go to ammo-nation store and after you buy a gun walk up to the clerk and try to point the gun at him the best you can because you can target him, kill him, he shoots back so do it fast and after you kill him walk up to the counter and you will get his shotgun.

Extra Cash:

Not a cheat, more of a hint. When in an emergency car (cop car, ambulance car, fire truck) or a taxi. Press the right analogue stick (R3) and you can do a sub mission for extra cash

Up to 5 Cars in your Garage:

In your garage in Staunton Island you can only hold 2 cars...right? Well...there is a way to keep up to 5 cars in there at once!

Here's how you do it:

1. If you have 2 cars already in your garage, go get another one, and bring it to your garage.
2. Park it right in front of the garage with its nose practically on the garage door. (Don't worry this cheat will fix that dent)
3. Then get out of your car and walk to the garage door and when it opens, quickly jump back into your car and gas it!
4. The garage door will try to close on it, but it won't. Park it deep, so the garage door can still be closed.
5. Get out of the garage and presto, 3 cars in there now!
6. If you re-arrange your cars (sideways works well) you can fit 5 cars in your garage and it still closes, letting you have 5 nice cars ready to take out.

Yardie Lobo Shocks:

In Staunton Island you can jack the Yardie Lobo, when you speed up and slow down the shocks drop and lower naturally, but if you use the right-analog stick the suspension rises and falls in whatever direction you push it. You can actually roll the car from a stopped position, try it it's fun. Oh yeah, you don't have to save it for your garage to repair your car, just back off so the door closes then get near it to open and your car will be repaired.

Lots of cash:

For this to work you need two memory cards with a bit of cash on both and a reasonably good car worth about 1,0000 (it doesn't matter though). After that go to "trade" go to the memory card with that car. Then buy it get out of that and go to the other memory card and buy it back (As you just bought it, that one will have more money so buy it back)So the money go's back to you. The car actually duplicates so if you done it five times you would have five of them cars and never of spent a cent but you still have the cars so sell it then repeat as many times as you want. But keep one in case you like.

Get the tank:

All you need is about 15 rockets and 15 grenades and some armor. Get a big truck after you get the stuff mentioned above and go the third level with the airport. Get two stars so the police will follow you to the back of the airport. Go to the Helipad with the police helicopter and get on top of it. Throw the grenades to destroy the police that will come below. Use the rockets on the pesky helicopters after you get full stars start watching the ground for tanks when they come throw a grenade to kill the guys and hurry and jump in. This is the easiest way I could figure out how to do it.

Fast Car:

On portland city go to 8 balls BOMB SHOP then go right into the car sales and you will see a banchee car in a glass room smash the window with a car and hey presto you have a nice car

Hidden Packages:

When you see the ROCKSTER billboard, there are usually some items nearby. On the 3 islands, hidden packages are usually found near the billboards. For every 10 hidden packages you find, you gain access to a new weapon located at your hideout, free of charge.

Police Bribe:

Get 45 kills in vigilante mode to unlock a police bribe that is available in your hideout.

Easy"infinite"Run:

To continue at a fast pace without fatigue, just TAP x instead of holding it down. This helps when trying to give your character EXERCISE so that he can run for a long period of time as well.

Bonus Buggy:

Successfully complete the Mafia missions to unlock the Buggy. Return to the Portland and go to the Diablo parking lot (where the mission phone is located) between 19:00 to 24:00 to find the same Buggy glimpsed in Joey's garage from the Mafia mission. It will appear in the same location & change color each time.

In the Northpoint Mall, go into the Tarbrush Cafe. Go into the back room to find the katana.

9. Northpoint: Easy money:

To get an easy \$200 to \$300, go to Northpoint Mall and follow a police officer until he begins chasing someone. Attack that person with your fists (no brass knuckles -- you gain more money without them) to get \$50 for every punch you throw. Be sure not to hit the police officer.

12. Caddy: Drive out of the golfing area:

Enable the "Dodo car" code. Steal a golf cart (Caddy) and drive towards the exit area (where the view is from a security camera). Instead of going in that area, go up the grass hill to the left of the stairs. Fly over the house by pressing Analog-stick Down. Try to avoid the windows which pop out and stop you from flying. If you make it on the roof, go right or left immediately to avoid the big pillar then continue down to the street. This may be difficult at first, but can be done with some practice.

13. Helicopter: Hovering:

Hold L3 while flying a helicopter to hover. This can be used to immediately slow down while flying fast.

14. Knife:

Go to the alleyway in the south-east corner of the east island (where you start) to find the knife.

15. Leave car door open:

Exit a car while holding Handbrake. You will not close the door, which can be useful if you know that you are going to need to get back in quickly.

16. Restore health:

Go to your hideout and go to "Save". Either save or leave without saving and your health will be restored to full. Note: Your wanted level will not decrease

Robbery:

To rob a store, all you have to do is point a gun at them. You have to hold it for a long time

and the longer you hold it the more money he will give you. The alarm will sound, and the cops

will come, so get the money and get out. (NOTE: you can drive a motorcycle in the mall, so get a

PCJ 600, and get ready to run.

Here is a list of stores that you can rob.

Two more helicopters:

I have found three helicopters. All mavericks. There is a regular one on top of the Hyman Condo. A swat one on top of the police station nearest the stadium. And a news chopper on the VCN building. The VCN building does not have stairs to it, you will need to get to one of the two other helicopters. Fly it over to the building, land, and then grab it. These helicopters will be there most of the times, but sometimes they will not be there, if this happens, just go do something else, like a mission, then go back and see.

Change the Moon's Size:

Just shoot the moon with your sniper rifle.

Tactics for Valmar parts:

Tounge of Valmar

This one is simple , stock up on Yomi's elixirs , and wound salves , Then set every one except Ryudo to AI healing and powering up you do this by going to AI during combat and Select AI then , go to Manual , edit the Tactics and keep Ryudo on Manual .

Eye of valmar

Focus your main attacks on the bat's first 'cause they truly mess up the battle then let loose on the eye , forget the tendrils! Recover every time your HP drops below 500. (I was on level 32 , w/ Ryudo and the others so I might have cheated.)

INTRODUCTION

GTC Africa combines rally racing with wheel-to-wheel racing action across the continent of Africa. The settings are definitely intriguing, and some are eye-catching enough that it is very easy to focus on the scenery (such as Kenya's waterfall with a rainbow) and not the often-tricky race course itself. In fact, if an area is particularly scenic, it is generally an indication that that portion of the circuit is very difficult.

This game also introduces something rather novel in racing games: Team Status. In many racing games, all that matters is that the player earn enough points in a championship to win the championship. Team Status takes this a step further, so that the driver's skill - measured in the amount of damage a car receives during a race - is factored in. Team Status is only used in Championship Mode.

To begin playing, go first to Options and adjust all the settings if necessary. Then go to Single Race and participate in both of the initially-available circuits; this will give the player a good feel for the game and also allow the player to test the various cars owned by each team.

=====

CHAMPIONSHIPS

Championship Mode contains three championships: East Coast Championship, North-South Challenge, and African Tour. It is especially important to win as many events as possible early in each championship, as it will become more and more

difficult to perform well in the latter races of a championship.

In each championship, points are awarded ALMOST in FIA style:

P1 10 points

P2 6 points

P3 4 points

P4 2 points

P5 1 point

P6 0 points

For comparison, FIA style is as follows:

P1 10 points

P2 6 points

P3 4 points

P4 3 points

P5 2 points

P6 1 points

Thus, unless a driver has a significant lead in championship points entering the final races, simply finishing a race DOES NOT guarantee earning points.

The East Coast Championship uses the following circuits:

Cape Town

Lesotho

Botswana

Zimbabwe

Zambia

Tanzania

Kenya

Ethiopia

Eritrea

Egypt

The North-South Challenge uses the following circuits:

Egypt

Libya

Tunisia

Morocco

Mali

Nigeria

Congo

Angola

Nambia

Cape Town 2

The African Tour uses all the circuits from the two previous championships.

=====

TEAM STATUS

At the beginning of Championship Mode, the player chooses a team, and starts with a Team Status of 50%. As the player performs worse and worse in the championship and the car receives more and more damage, the Team Status drops; the better a driver's performance in each race and the less damage a car receives per race, the Team Status rises.

Fortunately, teams do understand that some damage is likely to occur in a race; cars swap paint, the rear end swings out on tight corners and bangs a barrier, etc. Thus, if the car takes less than 10 points of damage, this has no effect on the Team Status. However, at 10 or more points of damage, the Team Status fluctuation per event receives a penalty,

which can generally be offset by performing well in a race. In an extreme case, the car can receive 30 or more damage points in a race, which results in a penalty of -6% to Team Status; only a race win - which earns +8% to Team Status - will keep the driver's Team Status from dropping after that race.

Team Status is also important for finishing each race. In Championship Mode, the driver must complete each race within the time allotted. If the Team Status is higher than 50%, the allotted time is slowly raised. However, if the Team Status is lower than 50%, the allotted time is slowly reduced. A higher allotted time obviously allows more time for race completion, thus slightly easing one of the driver's many concerns during a race. However, as the allotted time decreases, this adds more and more pressure on the driver.

CIRCUITS

GTC Africa boasts a total of nineteen circuits. Unfortunately, the game does not provide a circuit overview until that circuit is loading; a course map is not even provided until the race is underway. Therefore, here are the nineteen circuits of GTC Africa, along with both what the circuit-loading screen states and my personal observations.

Cape Town

Loading Screen: Mainly tarmac road, with a short off-road hill climb, twisting down into a high-speed coastal run punctuated by fast bends.

Personal Observations: This first circuit is fairly easy, but it is still possible to overcook corners and lose valuable race positions. Extreme care must be taken along the coast, as several of the corners are much tighter than they at first appear.

Lesotho

Loading Screen: Dry dirt track with wide sweeping bends, grit, sand, and a short tarmac section.

Personal Observations: This is also a fairly easy circuit, but beware the banking on either side of the course, as it can easily cause the car to flip.

Botswana

Loading Screen: Fast, dry gravel track and a short tarmac road section with fast straights and tight challenging corners.

Personal Observations: Good power out of the corners is key here. Take care in the final straightaway, which contains several jumps and a narrow bridge; coming off a jump somewhat askew is likely to destroy any chance of winning here.

Zimbabwe

Loading Screen: Short tarmac section with dirt track descending into a twisting muddy gorge, then winding sharply through the countryside.

Personal Observations: The twisty section between the mountains is an excellent place to pass by getting on the inside of an opponent and bumping the other car(s) off the optimal racing line. Except the twisty mountain-floor section, the course is fairly well-marked.

Zambia

Loading Screen: Fast, dusty track, twisting through a lush, populated valley.

Personal Observations: This course is roughly in a figure-eight configuration. Take extreme care with the final portion of the circuit, as the course is narrow with fences on either side; single-file is almost certainly preferable here.

Tanzania

Loading Screen: High-altitude tarmac road snaking across a mountain, covered with ice and snow.

Personal Observations: This is another course in a figure-eight formation. If running in a pack, go through the tunnel single-file to avoid incurring A LOT of damage, as the tunnel is VERY narrow. Also, brake well before exiting the tunnel, as the road takes a nasty left-hand perpendicular turn.

Kenya

Loading Screen: Slippery jungle track with tight bends, opening up onto a baked dirt track twisting across a sweeping dusty plain.

Personal Observations: Whenever possible, straightline the consecutive tight S-curves. Also, keep the eyes on the road, especially around the waterfall.

Ethiopia

Loading Screen: Slippery dirt and mud track with many tight corners.

Personal Observations: This dusk race has reduced visibility, so intimate knowledge of the circuit is key to success here. The course itself is lined with high, steep banks and occasional boulders, so keep to the racing surface at all costs!!!! Also, on the approach to the tunnel, it appears that the tunnel is essentially non-existent, like the fake tunnels in Warner Bros.' Wile E. Coyote cartoons; however, keep powering on through, as the 'fake' appearance is simply an illusion created by the upward slope of the dirt/mud road through the tunnel.

Eritrea

Loading Screen: Fast tarmac road climbing from a village into coastal hills, descending into a sandy, twisting beach section.

Personal Observations: It is VERY easy to slip off the road here, especially in the sandy section at the end.

Egypt

Loading Screen: Dusty, tarmac road with sandy sections and many sharp bends.

Personal Observations: It is VERY easy to overcommit to the many consecutive hairpin corners. Also, this race takes place at dusk, so visibility is fairly poor.

Libya

Loading Screen: Hot, dry and barren desert section on tarmac road, twisting over sand into the cool shadow of the hills before emerging again onto baking tarmac.

Personal Observations: It is IMPERATIVE to stay on the racing surface, otherwise, the sand will slow the car to a snail's pace and allow the competition to quickly catch up and make easy passes. In the final third of the circuit, the road runs directly into the blazing sun, making visibility difficult.

Tunisia

Loading Screen: Largely tarmac roads, with a high-speed dash past beach-front hotels and a twisting section past a Roman amphitheater in the desert sands.

Personal Observations: Drivers who get caught out in the sand here will lose speed, but not nearly as much as in

Libya. Beware the boulders, lampposts, and palm trees along much of the circuit. Intimate knowledge of the course is key to success here, as many corners are unsighted on approach. Shortly after passing the hotels, the road narrows with fences on either side.

Morocco

Loading Screen: Tarmac road winding through a fortified town, then dirt road snaking upward into the surrounding hills.

Personal Observations: This tiny venue is extremely tricky. There are several points where the road briefly diverges, which - if used judiciously - can allow for easily passing a pack of cars. However, the many trees and lampposts provide constant obstacles all along the circuit. Also, there is a section of consecutive hairpin corners - all on an uphill slope - which will make players wish they were attempting to pass the Complex String Time Trial in the Arcade Mode of Gran Turismo 3!!!

Mali

Loading Screen: Cracked earth road skirting a lake before climbing into a twisting hill section.

Personal Observations: Climbing the mountain is made very tricky with the position of the sun. Excellent cornering will be required descending the mountain.

Nigeria

Loading Screen: High-speed circuit with tarmac and dirt track sections, circling a volcanic crater lake.

Personal Observations: This almost perfectly circular circuit is highly unique in that it also offers a split in the course; however, the Start/Finish 'Line' is actually two Lines as they are located about two-thirds of the way along this split!!! Perhaps the best path to take at the split is to the right, as this provides the best possible racing line when the two paths rejoin at the entrance of a narrowed corner.

Congo

Loading Screen: Deep jungle mud track with fast bends and straights with jumps.

Personal Observations: To quote JP from SSX Tricky, 'Le retour de la jungle!!!' The road is certainly wide enough for two-wide racing; some sections may even accommodate three-wide racing. However, there are barriers on both sides of the road almost the entire way around the circuit, so there is no recovery area in case a driver overcooks a corner. It is also quite interesting seeing the birds fly by :-)

Angola

Loading Screen: Fast dirt track, with a sweeping desert section.

Personal Observations: This course has several jumps, some of which can be treacherous because - if taken at full speed - the landing zone is directly against a barrier. Some corners are better approached as wide U-type corners.

Nambia

Loading Screen: Dirt track and tarmac through narrow gorges and across wooden bridges.

Personal Observations: Due to the narrowness of the circuit, expect passing here to be extremely difficult, almost as difficult as passing at the Grand Prix of Monte Carlo in F1 racing. Fences and rock cliffs line most of the circuit, with several large boulders also providing incentive to keep using the brakes.

Cape Town 2

Loading Screen: Inner city, street driving on tarmac with many tight bends.

Personal Observations: This is even more annoying than the Complex String circuit in Gran Turismo 3 :- (This course is almost entire comprised of right-angle turns which double back on themselves. Even worse, the brief straightaways between the corners are too long to treat these as wide U-type corners. Also, plenty of fencing blocks any possibility of shortcutting a corner, so passing to the inside of an opponent on braking will be quite difficult here. Driving on the cobblestone streets feels really weird if the vibration function is activated.

=====
=====
=====

WISH LIST

Since race venues are only unlocked by performing well in Championship Mode, drivers should be permitted the opportunity to take a few practice laps at each new venue in Championship Mode. This would be FAR better than 'forcing' drivers to participate in races with no prior knowledge of the venues in their first time through the Championships.

Qualifying would be a nice addition to the game :-)

It is very easy to forget how many laps have been completed and how many remain; having a lap counter, or a message indicating Final Lap, would be greatly beneficial.

Since accumulating ZERO damage points in a race is rare, this should be rewarded by the team by raising Team Status, perhaps by 4%.

Harry Potter: Quidditch World Cup PS2 cheats

[Return to Main Index Page](#)

Team moves:

Keep collecting Quidditch cards for your team until you receive the Quidditch Card for its special move. Note: Look at the locked cards to find out their unlock requirements. You must get enough cards to do the team's special move. A message under your team score will appear when you are able to do the team special move. Play well during a match to increase your Snitch power bar until the message appears.

World Cup:

Defeat all three other teams with one team to play in the World Cup. Note: At the Quidditch Cup for Hogwarts and the Quidditch World Cup, it is best to replay any matches that you have lost to keep your score up.

Queerditch Marsh:

Win the Quidditch World Cup with any country to play in the place where they first invented Quidditch, called Queerditch Marsh. You can play multi-player or against the CPU.

Get Snitch gauge up:

To get your Snitch gauge up, whenever you pass to another player hold L1 + R1 to make a combo pass. After that, you must score to get your gauge up. The more combo passes you make, the more your Snitch gauge increases. If you do a lot of passes with combos and the other team steals the Quaffle, you must do more combo passes to get your Snitch gauge up.

Easy scoring:

At the beginning of a match, hold the Left Analog-stick Up/Right to start out with possession of the Quaffle, making it easier for the first score. Usually making the first score assures that you will win the match as long as you follow the other scoring tips.

More Quidditch Cards:

Play the Challenges and beat the Team Record to get more Quidditch Cards.

Better items:

To acquire almost anything, you must first collect Quidditch Cards. To unlock the best broomstick, the Firebolt, you must collect 50 Quidditch Cards.

Recommended team:

The best team to pick for Hogwarts is the Ravenclaw team. The Ravenclaw team has a Team Special Move that allows to get 30 points.

How to Get the Dog:

When you begin the game, you'll notice several stray dogs wandering around. If you approach them, they'll run away. To woo a dog to your yard, keep putting food in his bowl. Anything will do: grass, eggs, berries. When you place these foods in the bowl, they immediately turn into doggie mush. After a while, you will notice the dog appearing at your farm more and more. Keep trying to pick up the dog (X). At some point, he will let you pick him up, and he will be yours!

Horse:

To get the horse, you'll have to visit Bob's farm quite a bit. Do part-time work taking care of his horses and cows and give him lots of presents. Eventually, after a solid chunk of work (a season or more), he'll bring a horse to you.

How to Train Your Dog:

Once you get a dog to stay on your farm, you'll have to train him. To do so, use the following button presses in order to get him to do what you wish:

Sit: UP, LEFT, DOWN
Down: UP, DOWN, DOWN
Heel: LEFT, RIGHT, RIGHT
Drive animals: RIGHT, LEFT, RIGHT
Jump: LEFT, UP, RIGHT
Sit up: DOWN, UP, UP

Power Berry Locations:

To get the Power Berries scattered around the land, look in these places:

1. In your pasture.
2. Visit the Harvest Goddess.
3. Visit the Harvest Sprites.
4. Go fishing.
5. Trigger the "Sacred Land" event.

Beating the Final Boss:

When fighting the queen, the energy sword is paramount. Whenever you are holding it, her shadow attacks cannot touch you. If you take a hit without it, however, you will turn to ash. The way to beat the queen is to hack at her shield with the sword. Once you hit it, the sword will fly from your hand and you'll have to retrieve it. Immediately after hitting the shield, run behind one of two statues at the center of the room. The shadow attack will pass you by.

From this position of safety, scan the room for your discarded sword. The first time it is rejected, it will end up in the right side of the room. The next three times, you will find it on the left side of the room. After four hits, the queen's shield will drop. This time, your sword ends up well behind the statue. Hide behind the right statue. As the shadow passes, you will notice a safe zone on the ground -- a kind of oval. Get as far back in the safe zone as possible. As soon as the shadow wave passes, head straight back from the statue and run to the sword. You'll grab it just as her next wave reaches you. With the sword in hand, stride to the front of the room and strike the final blow.

Second Ending:

After you beat the queen, wait until after the credits roll. Another cut scene will play, then you will take control of Ico on the beach. Move far down the coast to the left and you will find a surprise.

Ratchet And Clank: Easy Bolts:

Use the following trick to get 150,000 Bolts in 45 minutes. Get your helipack on Metropolis, then go to the Gagatron all the way in the beginning. In front of the Gagatron, (aiming towards the big person with the wrench who spins around) jump down and turn around. You should see a tunnel. Go into it for a gold Bolt, and break all of the boxes. In 15 seconds you should have 2,073 bolts. Then, fall down and repeat the steps all over again, except for the helipack.

Contest Strategy

Contests : if you want to do good in the contests, follow this simple formula :

- 1: do 4 snapturns to get your special up.
- 2: do at least EIGHT special air tricks. even if it's the same one but try not to.
- 3: do floaters, snaps, gouges, special face tricks, and any other face trick you can think of until there is 45 seconds left in the last minute.
- 4: with 45 seconds left, get short 20-30 second barrel ride doing at least 25-30 tricks. this should score anywhere from 50-70 thousand points.
- 5: with about 15 seconds left in the heat accelerate out of the barrel and max out the face tricks again.

MANAGE YOUR TIME

Big Points:

message: To score huge combo points, first get barreled. do anywhere from 30 to 40 tricks in it (using Y) when you come out, quickly do a carve up the face to keep your combo from running out. do a few floaters , snapturns and some arials. if you are about to fall , QUICKLY push "UP" on the C-stick to cash in the points you already have. I have scored a 216,000 point combo doing this ,all in about half a minute. use the barrel to get fast trick points when you are running out of time after you get all of the icons (if required). If you master this nothing can stop you. There is only one thing that this will not work on. that is the last contest at G-land. you have to score a 9.3 on air, tube, and face. I still haven't beaten it.

Easy Level Gain:

At the beginning of the game when you are being asked questions always choose the top ones for a faster level gain. If you choose the bottom ones you level up slower.

Fight the final boss:

You must finish the story 'till the Final Rest of The End Of The World before fight with Ansem. You can go out using the Save Point.

In Agrabah, talk to the flying carpet and it will take you to the desert. You can find it inside of Aladdin's house.

In Neverland, go to the room that has a Save Point. Use the Save Point to switch Peter Pan with Donald or Goofy. Talk to the Twinkle Bell. Then, you can fly to The Clock Tower and fight with The Phantom.

Prepare yourself first because the boss is so tricky. Make sure you bring the right item.

Different Ending:

Finish the game and get all Keyholes, 99 Dalmations & the Hades Cup

Get lots of money:

Go to Deep jungle and find a heartless monkey (the yellow one) if you defeat it you can get a lot of money (you can have more money if you go there after you fight Ansem the first time)

Quick reset:

To do a quick reset in Kingdom Hearts press and hold L1+L2+R1+R2.

This is much easier than resetting the console. Note that this will send you back to the menu.

How to beat Riku:

After 4 hits he does a flying kick move, make sure you dodge it because it does major damage to you then make sure not to fall off the ramp because you'll lose the match if you do

Fastest Way of Lvling (at beginning):

When you start out the game and you choose what ever you want... and you talk to Kairi, and blah.. go up to Wakka , and talk to him he'll ask for a round to fight what not choose "sure ill play" ok..after that..keep a distance, when he throws you the ball , attack, making sure to time it right and to stay at a angle so you can "tech" and not hit him..this way you get points faster , and practice on your timing...trust me it save a lot more time then fightin them one by one or three on one so like in 5 mins you'll have like 25 points or more of exp.

Rare Truffle Victory:

In the Coliseum, for the Hercules cup. Know the annoying monster that disappears as soon as you hit it. Well, target the truffle and the first time you hit;it'll go flying into the air. When this happens, jump and attack it once. It'll pop right back up into the air. Repeat this and make sure it doesn't hit the ground or it will disappear. It takes a long time to kill it,but it's worth it. This monster gives around 4,000 exp's. More than any other normal monster in the game. Great for leveling up!

How to beat Sephiroth:

In the coliseum ,the platinum match. You have to face the almighty Sephiroth, harder than the final boss. Equip Strike Raid and the Oathkeeper Keyblade.Cast the shield and use Strike Raid when ever you can. Once his life starts to go down,he uses his angel attack which drains all Hp and Mp. Stop him before he uses it.Futher down the line he'll power up and go ballistic. Just keep your life up and use strike raid and don't let him use the angel attack or your dead.He gives the most exp's in the entire game.18,000.You'll level up every time you beat him.I went from level 60 to 90 in 2 hours.

Easy Lvl. Up:

On Destiny Islands talk to Tidus and fight him, if you time it right you can hit his rod to give you 2 Exp. This is the quickest and easiest way to level up.

Early xp and unlimited potions:

For much easier xp, and a free potion for each victory, fight Riku before you turn in you rope and cloth and logs. If you chose shield (or sword) as strength at creation, and magic as your weakness this should be no trouble. When he stands back and taunts you, hit him 3 times (he'll parry) and then step to the side. He will do a spin attack, missing you, and you can then do a 3 hit combo on him. It is worth 5 xp for defeating him, plus the potion. If you parry an attack of his it is an extra 2 xp. Just remember, if you use your first potion you will need to equip the new ones you won before entering a new fight. after a few tries or levels you won't even use potions and can start letting them stack up.

But once you turn in the logs, etc. and rest for the night you can no longer fight him, so level while you can!

Tips to beat Sephiroth:

How to beat Sephiroth easy (i dont think so) Rule number one: You really need elixirs on this battle. Rule number two: Read this you fool. You don't need a high level but i do recommend Lv.80 or higher He will start the battle walking and swinging his sword

toward you (duh!)and some times he makes a fiery wall around him you can jump and smack him in the head once he starts losing his real life (if you hit him you will see his life is not depleting you are wrong its only because he has to much life!) Once his life turns pink he will start running toward you and he will make a attack called Sin Harvest (if you listen carefully he will say "Sin Harvest" has soon has you hear those words run to him and hit him if to late i mean if a red thing appears in you run as far as you can and when the attack is done it will deplete youre MP and HP unless you have the Second Chance Ability so use a elixir before he.....gets you!) and also he will make !

an attack that hits you like a 1000 times at this time you can use Strike Raid which will make invincible when the attack in progress when his life turns yellow a black aoura will appear wilting him and he will throw lots of meteors and they will start surrounding him run around in circles so the meteors can hit you and when the meteors stop he will a huge one toward you from this point on he will no longer use "Sin Harvest" but his much faster and when he swing his sword he will shoot dark energy balls youst jump and smack him in the head. Abilities needed: 2nd chance MP Haste & Rage and Strike Raid.this strategy is very good but once you learn his pattern you can use you're own strategy. P.S. please mind my bad spelling am from Puerto Rico and i am 12 years old and thank you this also my first time doing a strategy.

Earthquake Hammer Hidden Weapon:

Right after you fight the dark wizard, a door (Previously locked by the wizard's magic) will now be accessible. Past the demented puppets and a door ahead there will be a hallway off to the right, the first door on the left in this hall is the doorway to an empty room (That's what I thought...) Find the very small hole on the north wall and equip "Lord Myu's Amulet. You will see a green panel in the ceiling. Shoot a bolt or arrow into the hole and climb up the staircase that lowered. Earthquake awaits, a powerful 2 hand hammer that causes slowness.

Ancient Sword Hidden Weapon:

After acquiring all magic crystals, make your way to the Ancient city's main tower...all the way at the top is a wall covered with tiny flames representing all the crystals you have gotten...open the doors that the flames burn on.

Short on Mushrooms?:

There is a small cliff near the lighthouse in the Widda area, five mushrooms grow here every ten minutes...you have to shoot them down with arrows.

Nullification:

The "Scorpion Blade" is one powerful F*&%er, equip the spider amulet or the antidotes in your hotslot and nullify the poison status it inflicts on you.

Quick leveling:

In the Flooded Castle there are always at least 2 water lizards in the main hall, strafe in close and avoid their ice balls, this is their only potent attack. When you close in enough they stop using magic and pull you in closer with their tongue like a frog, the instant you get in their biting range swing and stun them...then back up and repeat.

Demon Armor set:

DO NOT EQUIP THESE ARMOR PIECES!!! Their benefit is minor compared to most sets, the shield casts darkness on you the armor will slowly drain your health, the sacrificial mask will cast random spells in hopes to kill you, and the gloves will drain your health in exchange for power, the boots are the only things that don't hurt you but beware... when equipped the Death Walkers prevent you from running!

After completing the snake-like widda location you will find a Widda Bow, the arrows are powerful and hard to find but should not be conserved...by the time you get the bow you are practically near the end of the game...use 'em up...

The Bonus Material section comprises a variety of extras, such as voice-over sessions, 3D renders, sketches of enemies, and more. Extra Note on Already Submitted Codes:

On the codes that are already submitted for the game, I wanted to let everyone know that you actually have to beat the game to get them to work. Only restore health and restore ammo work without beating the game. You must unlock the "Secret Code" unlockable to get all of the others to work. To easily do this, play as Aragorn until you get to level 10 then play through the whole game as him again (note: do not start a new game, just replay all the levels) this will give him more experience points. Make sure you buy all of Aragorn's combos and upgrades, then play his secret level. When you beat it, you unlock a secret level with the secret character, beat it and you unlock the codes, and you can play through the whole game as the secret character!

Surprise the Secret Ghosts:

Have you noticed that in some rooms there are ghosts that won't appear until you turn your back to them? Well in one room where you meet the first one, there is a shelf of books that

explain that you should wait a few seconds and pretend that you aren't doing anything and then turn around with the flashlight on and stun the ghost so that you can press the R button to suck up the 100 lifepoint ghoul!

Easiest way to catch the Big book reading Ghost:

When you go to the room where the books fly at you go to the fireplace and start sucking the vacuum slowly walk backwards with the vacuum still on when you get to his tail like thing he will get sucked up and just hold on!

Get reading ghost:

This made me very frustrated and i could never figure it out, but I finally figured it out a day or 2 ago. There is this one room where there is this ghost and he is rocking in a rocking chair and reading a book (I think it's a book). Anyway, leave your light off because it won't effect him. Wait for him to yawn, then hit him with the flashlight! I don't know why the designers made him vulnerable to the flashlight only when he is yawning, but just like the tootsie-pop commercial says "The world may never know...."

The Big, Bad Boo's Attacks:

In the start of the game, Luigi releases 50 Boos. Yes, 50 Boos. To find the Boos, search lighted rooms with your Gameboy Horror in the corners. Yes, in lighted rooms. A green light means there's no Boo, yellow means you're close, and red means you're

right on target! Press the A button to examine the area and hopefully find a Boo. Your reward, a large diamond!

Water the Diamond Plant:

Below the balcony where Toad is there is a dog house and a plant where you can get one of the game's secrets. Once you have the water element go to the plant before you face the second boss and water it. Then, return and water the plant after you beat the second boss. Then, once more, return to water it after you beat the third boss. Your reward is a large diamond (Note: if you fail to return and water it, then the plant will wither and die).

The Hidden Hearts and Money:

If you are low on life energy, then get out your vacuum and suck in any lamps, chandeliers, or vases. Almost every one will have money or hearts in it, so do it often!

The 2 Treasure Rooms:

There are 2 treasure rooms that are hidden pretty well. The first one can be found on the southwest corner of the mansion on the first floor. Use your Gameboy Horror in the room to find the mouse hole and then press the A button to go in to the treasure room. The second room is hidden so well that you can only access it from the rooftop. Fall down the chimney and you'll be in the last treasure room!

Extra Treasures:

When you are sucking up a large ghost (Like the one sitting in the library), he will drop more treasures the longer you hold on to him. If you manage to suck up 90 of his HP continuously (note CONTINUOUSLY), he will drop EXTREMELY expensive treasure worth up to \$10,000!

Ceiling Fan Secret:

In the room with the ghost brushing her hair, there's a ceiling fan. Use your vacuum on it. By now, you would of thought that there is nothing in it, but if you make it goes faster and faster, lots of treasure will come out.

Hidden Hole:

There's a mouse hole on the east wall of the butler's room. When you select the hole with the Game Boy Horror and press the A button, you'll earn passage to the treasure-filled hidden room.

How to Catch SuperModel Ghost:

In the Master Bed room there is a chair in the corner by the window, if you turn your back to it or look at it through the Gameboy horror, you will see a ghost that has a red dress on, if you go over to the window and pull the curtain back, she will go over and close the curtain back, and that is your time to suck her up.... OH yeah watch out for her mushroom things!

Mirror Trick:

Go to any mirror, than use the Gameboy Horror and do a search directly at mirror. Should take you to Mansion Lobby. Good if you want to save and you dont want to

travel through ghosts and stuff.

Beat The Big Baby:

If you are trying to beat the baby Chauncey then, here is your answer. Ok first, go to the rocking horse in the back of the room. Then, start sucking the rocking horse so that it begins to rock back and forth. Chauncey will appear over top of the horse and ask if you want to play with him. As soon as he starts attacking, suck up the ball so that it gets stuck on the vacuum, then, keep sucking until you are aiming at Chauncey, finally, stop the sucking and switch to blowing, the ball should shoot at Chauncey, after that he will turn Luigi little. Avoid the rocking horses and when he starts throwing balls at you. When one hits the back of the crib and bounces to the front, suck it like you did when you were normal size and shoot it at him, if it hits him then aim your vacuum up a little bit and when his heart appears, start sucking him in, if you don't get him the first time try again, before he starts throwing the rocking horses, he will cry and start pounding the ground with his stomach, avoid this and repeat the above. When you have finished him off, you will be transported back to the lab.

How to beat Bowser:

When bowser throws his spiked bombs at you wait for them to stop moving. Then pick them up with you vacuum. Then you have to wait till bowser lowers his head to breath fire or to breath you into his mouth and shoot it at his mouth the head will pop off and boo will pop out now turn on the vacuum and lower his health points while avoiding the ice blasts that comm from bowsers head. Repeat this process and you will beat bowser.

Level 1 Tasks

| Task | Strategy |
|----------------------------|----------------------------------|
| Make a 40+ yard field goal | Try kicking with Elam in Denver. |

| | |
|--|---|
| Punt the ball 50+ yards | Craig Hentrich of the Titans has a booming leg. |
| Hold CPU under 7 points (min quarter=4) | Play Cincinatti or Arizona. |
| Score 21 points in a game (max quarter=6) | Play as the high-flying Rams. |
| One reception by 3 different players | The Rams, Vikings and Packers have great receiver tandems. |
| Throw 2 TD passes with one player | Again, Kurt Warner of the Rams is your man. |
| Gain 200 yards of total offense | A balanced rushing/passing attack will be key: Try the Rams, Titans or Colts. |
| Complete 5 consecutive passes | Go with Brett Favre (GB) or Peyton Manning (IND) here. |
| Complete a 30 yard pass | Booming arms include: Jeff Blake (NO), Brett Favre (GB) and Kurt Warner (StL). |
| No dropped passes all game (min quarter=4) | Good hands teams include the Rams, Colts and Jaguars. |
| No offensive fumbles all game (min quarter=4) | Protect the ball with the Broncos, Falcons or Rams. |
| No interceptions thrown all game (min quarter=4) | Go with Manning (IND) or Warner (StL) at the helm. |
| No sacks allowed all game (min quarter=4) | The best lines in the league? St. Louis, Indianapolis and Jacksonville. |
| Defeat the '99 Titans at Tennessee in the rain | Go at them with the St. Louis Rams or Indianapolis Colts. |
| Defeat the Indianapolis Colts at RCA Dome | Take the Rams, Jets or Dolphins into battle. |
| Recover a fumble on defense. | Be sure to use your L2/R2 buttons to attempt a strip of the ball. |
| Intercept a pass on defense. | The Dolphins and Redskins have some of the best DBs in the land. |
| Sack the opposing QB. | Jevon Kearse (TEN) and Junior Seau (SD) are all you need to get this job done. |
| Record 3 tackles with one player. | This will almost always happen during the course of a game, regardless of team. |

Level 2 Tasks

| 30 Yard KR avg for one player (min returns=2) | Desmond Howard (DET) or Brian Mitchell (PHI) are the men for the job. |
| 30 Yard PR avg for one player (min returns=2) | Deion Sanders (WSH) is the answer. |
| Score 42 points in a game (max quarter=6) | High-powered offenses like the Rams, Titans or Jaguars are good for this challenge. |
| Defeat the CPU by 28 points (max quarter=6) | Can you say Vikings vs. Bears? |
| 10 yard Rush Avg for one player (min attempts=5) | Eddie George (TEN), Corey Dillon (CIN) or Ricky Williams (NO) have the skeelz to make the dealz. |
| Gain 100 receiving yards with one player | Throw to Antonio Freeman (GB), Joey Galloway (DAL), or Randy Moss (MIN) for this one. |
| Catch 2 TD passes with one player | Cris Carter (MIN) and Keyshawn Johnson (TB) are good targets for this goal. |
| 20 yard Rec Avg for one player (min receptions=3) | Throw deep to Wayne Chrebet (NYJ), Randy Moss (MIN) or Carl Pickens (TEN). |
| Score 3 Rushing TD's with one player | Call on Ricky Williams (NO), Terrell Davis (DEN) or Emmitt Smith (DAL) to get the job done. |
| Throw for 300 yards with one player | Kurt Warner (StL) or Brett Favre (GB) are your best bets here. |

| | |
|--|--|
| Throw 4 TD passes with one player | Kurt Warner (StL) and Daunte Culpepper (MIN) can put the biscuit in the basket. |
| Complete 80% of your passes | Try the 90 49ers, 97 Packers or St. Louis Rams. |
| Complete 10 consecutive passes | Again, Kurt Warner (StL) is your best option. Try the efficient Vinny Testaverde (NYJ) as well. |
| Commit no penalties in a game (min quarter=4) | This one is luck, but lay off tackling receivers before they catch the ball. Avoid the Raiders at all costs. |
| Defeat the '72 Dolphins with a regular team | The Titans (a good blend of D and O) are your best bet. |
| Record 2 sacks with one player | How about Kearsse (TEN), Butler (GB) on a safety blitz, or Warren Sapp (TB)? |
| Force 3 turnovers in one game on defense | Try the Saints, Dolphins, Redskins or Ravens to achieve this. |
| Record 5 tackles with two different players | Take Tampa Bay into combat to fulfill this goal. |
| Hold CPU under 150 total off yards (min quarter=4) | Play Arizona or Cleveland as Tampa or as Baltimore. |
| Gain 100 rushing yards with one player | Jamal Anderson (ATL), Terrell Davis (DEN), Corey Dillon (CIN) and Ricky Watters (NO) will make this easy. |

Level 3 Tasks

| Task | Strategy |
|--|---|
| Kick and recover an onside kick | This is tough, but the Titans and Falcons are pretty good at it. |
| Punt the ball out of bounds inside the 5 yard line | Craig Hentrich (TEN) is the best punter in the game. |
| Score 63 points in a game (max quarter=6) | Use the Rams or Vikes to accomplish this feat. |
| Shut out the CPU (min quarter=4) | The best team to accomplish this is the Tampa Bay Buccaneers. |
| Make 10 receptions with one player | Just throw him the damn ball! Keyshawn Johnson (TB), Terrell Owens (SF) or Marvin Harrison (IND) work well for this one. |
| 10 Rushing Attempts by two different players | Use the Tampa Bay Bucs and meet the challenge with Mike Alstott and Warrick Dunn. |
| Gain 100 rushing & 50 receiving yds with one player | The most likely candidate for completion of this challenge is Marshall Faulk (StL). |
| Gain 150 receiving yards with one player | Go for Terrell Owens (SF), Marvin Harrison (IND), or Randy Moss (MIN). |
| Gain 150 rushing yards with one player | The usual suspects will get the job done: Marshall Faulk (StL), Edgerrin James (IND) or Rickey Williams (NO). To mix it up a bit, use Barry Sanders of the 91 Lions. |
| Gain 400 yards of total offense (max quarter=6) | Deep passing and a steady running game are key when meeting this challenge. Try the Vikings, Rams, and Titans. |
| Break a 40 yard run | Catch the other team in a blitz or sprint around the corner to bust off some serious yards. You'll likely have to break a couple tackles to grab this much real estate. Try using Edgerrin James (IND), Jamal Anderson (ATL) or Robert Smith (MIN). |
| Complete 15 consecutive passes | Remember: these don't have to be long passes. If you're having difficulty meeting this challenge, try a bunch of screens and little dipsy-doo routes to secure the string of 15. |
| Complete a 60 yard pass | Hit Freeman (GB) on a streak from Favre, Moss (MIN) on a Hail Mary from Culpepper or Pickens (TEN) from McNair. |
| Hold the '99 Rams under 75 passing yards with reg team | The team with the best secondary wins. Try Miami or Washington. |

| | |
|--|---|
| Gain 150 rush yards vs. '75 Steelers (max quarter=6) | This one's tough. Use Sweetness (Walter Payton #34) of the '88 Bears or All-Bears teams to chisel at the Steelers' dominant front. |
| Recover 2 fumbles on defense with one player | Maximize your fumble opportunities by always pressing R2/L2 while tackling. After this, it is almost a matter of luck. This one is pretty tough to get. |
| Intercept 2 passes with one player | Deion Sanders (WSH) has been known to have two-interception performances from time to time. In addition, the Dolphins' entire secondary is pretty opportunistic. |
| Record 3 sacks with one player | Reggie White (#92) of the 1998 Pack, Lawrence Taylor of the All-Giants team, Jevon Kearse (TEN) and Warren Sapp (TB) are good bets. |
| Deflect 4 passes with one player | Choose a player on the line and raise those meathooks to the sky. Especially good at deflecting passes are Warren Sapp (TB) and Norman Hand (NO). |
| Record 8 tackles with one player | This is difficult. Unfortunately, it will usually be a linebacker or DB who records eight tackles. Take control of a 'backer, and roam up and down the line, looking for someone to stop. |

Level 4 Token Scale

Level 4 Tasks

| Task | Strategy |
|------|----------|
| | |

| | |
|---|---|
| Make a 50+ yard field goal | Again, Elam in Denver is the key. Also try Anderson in the Metrodome. |
| Punt the ball 65+ yards | You're really going to have to boom it. Play with Hentrich (TEN) at Mile High Stadium in Denver. |
| Make 6 two-point conversions in one game | This is tough, because you first have to score 6 TDs. As always, the Rams are the team for this task. Use crossing routes in the end zone to pick up the conversions. Note: There is no max quarter restriction here. Crank the time up to give yourself an edge. |
| Defeat the CPU by 56 points | This calls for outstanding offense and defense. Take the Titans vs. the Bengals and let the fun begin. Think Carl Pickens on a Streaks route. |
| Gain 100 rushing yards with two different players | Mike Alstott and Warrick Dunn of Tampa Bay can accomplish this goal. |
| Gain 100 receiving yards with two different players | This one's easier than a lot of other Level 4 challenges. Minnesota, St. Louis and Green Bay are good teams for completing this challenge. |
| Gain 200 receiving yards with one player | Can you say Randy Moss (MIN), Wayne Chrebet (NYJ) or Terrell Owens (SF)? Or go classic with the '90 49ers and hit Rice, Rice, Rice. |
| Complete 25 passes with one player | Kurt Warner (StL), Brett Favre (GB) or Daunte Culpepper are good bets here. Remember, short routes and screens count as completions, too. |
| 40 Rushing Att by one player (max quarter=6) | Try Ricky Williams (NO), Duce Staley (PHI) or Corey Dillon (CIN) for this. Trust me, they have to carry the team anyway. |
| Throw for 500 yards with one player | This means putting it up on nearly every play. A good corp of receivers helps, so go with Favre (GB), Warner (StL), Culpepper (MIN) or Brunnell (JAX). |
| Gain 650 yards of total offense (max quarter=6) | You'll probably need to use all 6 minutes to get this one going. To accomplish it, use a lot of deep passing plays. It's the quickest way to the most yards. Suggested teams: St. Louis (of course), '98 Packers, Minnesota Vikings. |

| | |
|---|---|
| Achieve 20 first downs (Max quarter=6) | You'll have to fight the urge to throw the ball deep. The object here is to get as many first downs as possible, not as many yards. Use shorter pass plays to break the field into 10 yard chunks. |
| Complete one pass to 7 different receivers | Spread the ball around. This means throw to every wideout in a 4WR set, a TE, your HB and your FB. The best hands team around is St. Louis, but this objective can be completed with anyone, as long as you're disciplined about distributing the pigskin to all seven. |
| Return a fumble for a touchdown on defense. | Use those R2/L2 buttons to strip the ball. It is difficult to scoop up the ball and run with it, but try to pick it up with a DB, as they have the speed you need to pull away from your pursuers. |
| Break a 60 yard run | This one is about speed around the corner, or catching a defense in a blitz. A speed back is preferred. Try Edgerrin James (IND), Corey Dillon (CIN) or Ricky Watters (SEA). |
| Cause 6 turnovers on defense | Again, set the time pretty high and this challenge will become easier. Be sure to use your strip buttons (L2/R2) to force fumbles, and gamble on interceptions. |
| Record 7 sacks with one player | Another tough challenge. If you can get a consistent safety blitz going, use that. Otherwise, Jevon Kearse (TEN) is your man. |
| Record a safety on defense | Good, penetrating defenses will get the job done. Try the Bucs, Titans, Saints and Dolphins here. |
| Return an interception for a touchdown | This can be done by picking off an out route or something near the flat. No one will be in front of you when you grab the ball. |

Level 5 Tasks

| Task | Strategy |
|--|--|
| Gain 200 KR yards with one player | Use Ogden (RHN) or Howard (DET) for this one. I find the Middle Return to be most advantageous in racking up yards. |
| Gain 200 PR yards with one player | Prime Time, Prime Time! Deion Sanders (WSH) is the correct choice here. |
| Return a kickoff for a touchdown | The above players will work well for this challenge as well. |
| Return a punt for a touchdown | Again, Deion is the best in the biz. |
| Score 84 points in a game (max quarter=6) | Take the St. Louis Rams against the Berlin Thunder and put the ball up top on every single down. Make sure you set the clock to 6 minutes, regardless. |
| Complete 100% of your passes (min attempts=5) | Make 5 passes, complete 5 passes. Then stop. To do this, use the Colts (great passer, excellent HB). Get your five completions, then pound the ball the rest of the game. |
| 100 receiving yards by three players | Get 100 with your two starting receivers, then 100 more with the HB out of the backfield. Shotgun/HB Fly plays work well for this challenge. |
| Gain 100 rushing & 100 passing yards with one player | Kordell Stewart (PIT) is your best hope of completing this feat. Daunte Culpepper (MIN), Randall Cunningham (DAL), Mark Brunell (JAX) and Jeff Blake (NO) aren't too shabby. |
| Gain 100 rushing & 150 passing ayrds with one player | Same as above. |
| 20 yard Rush Avg for one player (min attempts=3) | Bust off three long runs, then sit the dude. It seems unfair, but this is for a Madden Card!! |

| | |
|--|---|
| 200 passing yards by two different players | This requires a good starter and a good backup. Duos like this include Johnson and George of Washington, Grbac and Moon of Kansas City, Banks and Dilfer of Baltimore and Favre and Hasselbeck of Green Bay. Pass to 200, bench your QB, then go with the next guy. |
| Gain 250 rushing yards with one player | It's the usual suspects here: Terrell Davis (DEN), Ricky Williams (NO), Edgerrin James (IND), Eddie George (TEN) and Jamal Anderson (ATL). |
| Break 10 tackles with one player | This requires a strong back running inside. Try Dorsey Levens (GB), Eddie George (TEN), Stephen Davis (WSH) or Ricky Williams (NO). |
| Break an 80 yard run | To do this all classy-like, there are a couple men for this job: Walter Payton (#34) of the All-Bears squad and Barry Sanders (#20) of the All-Lions team. |
| Complete 20 consecutive passes | Again, all passes count, even screens. Don't run anything too risky and go with a team that has good hands: All-49ers, All-Packers, All-Dolphins, Rams. |
| Play injured and score a touchdown | Like it says. Suck it up. This one depends a lot on luck. |
| Complete a 90 yard pass | Booming arms include: Jeff Blake (NO), Jeff George (WSH), Brett Favre (GB) and Peyton Manning (IND). |
| Intercept 5 passes on defense | The Dolphins and Redskins are your best bets to complete this objective. |
| Hold CPU under 0 total off yards (min quarter=4) | Definitely take the clock down to 4, then clamp down. This is one of the hardest challenges in the game. The Bucs are probably your target team, though. |
| Record two safeties in a game | This starts with a couple of quality punts. Or, if you want to be creative, drive the ball to the one, then down it. Blitz the QB in the end zone to get the safeties. |

Then it will pause for a second and say "no cap room choose cancel to sign player yourself or choose ok to turn off salary cap permanately. "Its that simple warning though this will turn off owner mode for good

Kurt In His Boxer Shorts

At the Main Menu Press and hold L2 + R2 and enter:
SQUARE, SQUARE, TRIANGLE, SQUARE.

As soon as Kurt is done sky diving and is on the ground he'll be without his coil suit and sporting his boxer-briefs.

A Little Piece of Home

While playing through level 5 take a moment to stop and look through the alien telescope. To activate the telescope you must first destroy the BottRock Generator, and the panel on the ledge above the telescope. Now shoot the telescope lens to move it into a position where you can look through it to see crack animator Russ Rice on the Bioware balcony having a puff with some Conehead visitors.

Drop Camera

Here's a little trick that will make a new camera effect for you to play around with. By holding L2 and R2 and pressing CIRCLE, X, CIRCLE, X the camera will be dropped in place. As you move, the perspective will change like in Resident Evil. To return the camera to normal, repeat the code.

Farting Doc

Doctor Hawkins needs a new diet. At any time while playing the Doctor hold down L2 and R2, and press in on both control sticks. Now you can watch Doctor Hawkins do something Nasty.

Invincibility

If those pesky aliens are giving you a hard time, enter the Invincibility Code and they'll never kill you again. First pause the game. Now while holding down L2 and R2, press up, up, down, down, left, left, right, right, square, triangle, square, triangle, select, and finally start.

King of the Coneheads

In the Spider Room of level 7 one of the Sniper Balls will unleash a pack of Coneheads. Rather than shooting them, just stand around and wait. If you look carefully into the middle of the room while standing on the upper ledge you may just be lucky enough to see the King of the Coneheads!

MDK 2 Development Team are Stars

While playing through level 4 dont forget to take a moment to gaze at the stars in the large arena with the three Poopsy Generators. Be sure to kill all of the enemies in this room first so you can star gaze without getting killed. Now, using Kurt Hectics sniper scope, zoom in on certain special stars in the sky (they are usually slightly pinkish in color). There you will find the crack team that made MDK2 possible gazing back down at you, along with their Wu-Tang Clan names.

Matrix Camera Mode

While the game is paused press L1 and R1. This code removes the Pause Menu, giving you an unobstructed view of the spinning Matrix Camera Mode while the game is paused.

Maxs Slo Mo Mode

Want to check out the fine details in the animation? Slow it all down with Maxs Slo Mo Code. While holding down Maxs shoot button press Maxs equip weapons button three times.

The Hidden Castle in the Sky

In level 7as you are coming out of the tunnel toward the platform with the boss fight you will see two antennas which Kurt can jump up on. This can be difficult, but keep trying. Now turn around and face the tunnel that you came out of and jump to the roof of the tunnel. Now turn to your left and start shooting low at the sky with your Chaingun. You should eventually see your shots hitting something. It is an invisible walkway. Jump down on to it and keep shooting. Keep following the path of ricochet particles until you reach a little yellow square. It is a fan that will take you up to the next invisible walkway. Use your parachute and fly up. It takes quite a while to reach the top of the airflow, so be patient. Once you are at the top, rotate while firing your gun and look for the same ricochet effect and then fly towards it. Follow this the same as before and eventually you will come to the hidden castle. Take a look around the castle and you might discover something interesting.

Defeating the CPU:

Use the following trick to defeat the CPU with two to four players under the hard difficulty setting. Go to "Custom Rules" and set the houses to 88 and apartments to 22. Turn the jackpot on and set the Landing On Go bonus to \$400.00. Pick Land On Free Parking and set the jackpot to \$750.00. Use the classic view, as it is easier to see before choosing whichever board you desire. When you start the game, buy only the properties you can get three of and avoid the railroads and utilities. Do not bid top high on the properties that you cannot get much money for. Never bid more money than you have, as you do not want to mortgage properties. Try to get a set, even if it means trading with the CPU or offering them money. Sometimes you will have to offer them both. Once you get a set of two or three, put houses on the cheapest house first, unless you have Boardwalk and Park Place, so you can save money and eventually put up hotels on all your properties. If you have many houses or hotels and get in jail, try to stay in there as long as you can and collect your money. You can also stay in jail if the CPU has many houses or hotels to remain on the safe side. Try to have at least \$100 to \$200 or more to stay safe. Even if you have to wait to pass Go or land on Free Parking, once you start getting sets and hotels on those properties, try to get sets that are next to each other, or on an entire side of the board.

Speed Burst:

When on an incline, keep clicking the clutch button while on an incline. Your speed will gradually get up to 80 mph. A good place to try it on is the incline to the jump when you start out at the shaffter freestyle course.

A girl in a hottub:

In the freestyle level vulture gult canyon you find a secret tunnel you go through it as fast as you can you will see 2 jumps take the second one!! If you make it to the top you will see a girl in tub!

On the ground backflips:

First, come to a complete stop. Also make sure that you are on level ground. Then, hold down back, and press/hold R2 and accelerate at the same time while holding down back until you do a complete flip. *Note* You must hold down back first, and then press/hold R2 and accelerate.

Get on top of school on bus jump:

First you must go to career then you have to keep playing until it tells you that you can go to bus jump. Then go to freestyle and go to bus jump. When it starts go to the school there will be two jumps hit the second one and jump on the ledge. Ride the ledge until you come to a big black part. There will be a ramp. Go up it and there will be four giant jumps.

On the ground Front Flips:

First, start riding on a level ground. Make sure you are going straight, and once you come up to a good speed, hold forward and press/hold stop and R2. Hold all the buttons down until you do a complete flip and it registers your trick as a suicide flip. You must hold down forward first before you press/hold stop and R2.

Get rider UP RISE:

Win the Las Vegas freestyle 3 times in a row to be the most bad ass rider of the Metal Mulisha

Secret Area:

Go to the "Bus Jump" level on practice and put the time on 20 min. Go on top of the roof of the school and go to the very corner of the white wall. Get about 15 feet in front of it and to the bunny hoop thingy over the wall. This will take some practice, but if you make it over go to the right and just cruise. Oh Ya Make sure you Don't fall down in the ocean looking holes or your going to have to do it all over again.

Baseball Field:

Go to the "Bus Jump" level. Go over to the basketball court. The crash. You will start again in front of a little mini ramp. Go up to the ramp straight. You will land on a bench. Then when you reach the end of the bench hit the accelerator to make it to the next bench. And when you reach the end of the second bench hits the accelerator again and it will boost you over the fence. There is a baseball field. The only other thing I found has been a ramp leading back to the basketball court. It is not a special trick. It is just fun.

Creating a Dream Team

In Season Mode of NBA Live 2001, it is difficult to trade for players when you don't have the talent to swap. And because Live only allows player-for-player trades, you may not want to deal your top talent to improve your squad. But there is a fairly simple way around this. To beat the system, go into Season mode, hit CIRCLE to bring up the menu bar and select Roster from the bar. From here, select Create Player. When creating a player, load him up with maximum stats and save him into the Free Agent pool. Then, return to the menu bar, select Roster and Sign the player you've just made. If his rating is over 90, you will be able to trade him for any player in the league (including Shaq and Allen Iverson). Repeat this process until you have all of the talent you want. Now go win that championship, cheater!

Make a Super Star Even Better

At the Main Menu screen press O to open the Active Menu. Select the Roster option. Then select Edit Player, A Super Star will load up if your Create a Player List is empty. You can make the player's stats better (3 pointers, strength, dunking ect...) by hitting R2 at Edit Player screen. If you want a different player go back to the empty Create a Player List by pressing L2. Press Start and change someone else. Don't forget to save.

Easy EA Bio Growth:

Once you create an EA Sports Bio, just leave the system on with the game running, and you will log hours to grow the levels of your EA Sports Bio.

Five Year Plan:

It is possible to get five full years of eligibility for any of your players in dynasty mode. Begin by recruiting a player but do not redshirt him during freshman year.

Now before you end the season go to your rosters and use "Formation Subs" to sub the player into as many formations as you will want to use him in the next year.

Advance to the new season after doing all the normal off-season tasks. Go to the "Preseason Options" menu. Redshirt the player that you formation subbed. Exit the menu, set up your schedule and start playing.

The player that you redshirted will be in all the formations that you subbed him into. He will not appear on the depth chart and you will not be able to sub him into any other positions, but you will be able to use him and build up stats. So, when he is done with his redshirt season he will be a RS Sophomore but have played for two years with three more years possible (Sophomore, Junior, and Senior) for a total of five years of eligibility.

SMU vs. BYU Made Easy:

In the College Classic Mode, make the SMU Vs. BYU game much easier by turning off penalties in the Pause Menu. This way, you can kick very short onside kicks (which are easier to recover) and not get penalized.

Drive the car as if you are going to take the shortcut to the right of the cop car, but steer left at the last moment and stay on the paved road. The cop will take the short cut and lose sight of you for a while.
- After driving across the iron-work bridge and through the underpass, another cop will be waiting on the left. Follow the fence line on the right very closely and take the shortcut down the hill. This will not only shave seconds off of your lap time, but help you to lose the cops

Play as "The Hammer"

On the Create Player screen in the Rosters menu, create a new player and set his first name to Hammer. The announcers will refer to him as "The Hammer" during gameplay.

Be a Leader

First, enter the "edit lines" section after creating a player (for instance, yourself!). Then scratch the captain and the assistant captain of the team. You must be a good player and be rough in sprints. Then put yourself in the first line as the center. If you followed the procedures, you'll lead the team out of the locker room at the start of the game and be the captain!.

Play as "Animal"

On the Create Player screen in the Rosters menu, create a new player and set his first name to Animal. The announcers will refer to him as "The Animal" during gameplay.

Minor League Players

Some players now in the NHL spent the past year in the minors or as a free agent. EA Sports didn't overlook this aspect of the league. There are some players that aren't on any roster that will have stats available if you create them. Some of them may have an incorrect jersey number, handedness, or position on the game, which you can easily fix in the Create Player menu. Here are some of the players I've found:

Dale Purinton, New York Rangers defenseman, #5, left-handed
Garth Snow, Pittsburgh Penguins goalie
Johan Wittehall, New York Rangers/Hartford Wolf Pack (AHL) right winger
Jean-Francois Labbe, New York Rangers/Hartford Wolf Pack goalie, #31
Terry Virtue, New York Rangers/Hartford Wolf Pack defenseman

No Goalie

During a game, press the Start Button to pause the game. Select Controller Setup, now move your controller over to the other team. Return to the previous menu and select your opposing teams options. Next, select Team Options. Where it says Goalie Status, you can elect to pull the goalie. Return to the Previous menu again and go back into Controller Setup and move your Controller back over to your original team. When you return to the game the other team will have no Goalie. If you want to restore the goalie to the other team, simply repeat all of these steps and elect to return the Goalie to the Net.

The Cheat Cards:

Next up are the good old Cheat Cards. These can be played during a game and the duration of each particular cheat is determined by whether or not it's a bronze, silver, gold and, in some cases, platinum (the last three cards on the following list only come in diamond). For some of the cards, the duration will be in minutes rather than periods.

Bronze - Odds (1/600), Duration (1 Period), Boost (N/A), Re-Sell Value (170 points)

Silver - Odds (1/900), Duration (2 Periods), Boost (N/A), Re-Sell Value (250 points)

Gold - Odds (1/1800), Duration (3 Periods), Boost (N/A), Re-Sell Value (505 points)

- #154 Power Shot (turns player into big shooter)
- #155 Peashooter (turns opposing big shooter to normal shooter)
- #156 Bonecrusher (turns player into big hitter)
- #157 Crusher to Usher (turns opposing big hitter to normal hitter)
- #158 Muscles and Missiles (turns player into big hitter and big shooter)

- #164 Penalty Free (gives team immunity from penalties)
- #165 Off Target (causes # of opponent shots to miss the net)

- #166 Man Advantage (causes opposing team to be short handed for two minutes)
- #167 Frozen in Time (slows down time)
- #168 Bash Boom Bonanza (every player on both teams are made big hitters and shooters)

Diamond - Odds (1/550), Duration (N/A), Boost (N/A), Re-Sell Value (155 points)

- #169 Instant Penalty Shot (gives team a penalty shot)
- #170 Next Goal Wins (makes it sudden death overtime)
- #171 Clear the Deck (cancels all cheats)

The Celebration Cards:

One of the all-new features in NHL 2002 is the inclusion of user-controlled celebrations after goals. By pressing the corresponding button, either X, Circle or Triangle, the goal scorer will do the celebration that has been mapped to that button. There are six that are available at the beginner of the game and nine others that are opened up once you get one of the NHL Cards. Unlike the Player Cards and the Cheat Cards, these aren't used up once you use them.

Diamond - Odds (1/550), Duration (N/A), Boost (N/A), Re-Sell Value (155 points)

- #172 Superstar
- #173 Fireworks
- #174 Raise the Roof
- #175 The Rodeo
- #176 The Maestro
- #177 Home Plate Slide
- #178 The Archer
- #179 Wildman
- #180 The Swordsman

The Easter Egg Cards:

Just as the name suggests, these NHL Cards will open up Easter Eggs in the game. And just like the Celebration Cards, they are not per use cards and are available once they are earned -- the particular Easter Egg will need to be turned on in the Easter Egg menu if you wish to use it. All of these cards are only available in Diamond.

Diamond - Odds (1/850), Duration (N/A), Boost (N/A), Re-Sell Value (230 points)

- #181 Mile Wide Stadium (the rink is wide)
- #182 After Hours (lights are out, spotlights on players)
- #183 Big Heads (players have big heads)
- #184 Sumo Hockey (players in colored sumo suits)
- #185 Last Man Standing (players stay down once knocked down until whistle)
- #186 Shrink 'n Grow (players get big when you score, shrink when hit)
- #187 Deep Voice (deep voices)
- #188 Chipmunk (squeaky voices)
- #189 Topsy Turvy (reversed controls)

The Tasklist:

As mentioned previously, the biggest difference between the Cards in NHL 2002 and the ones in Madden NFL 2002 have to do with the Tasklist and how it's operated. Whereas you could keep earning points for one task in Madden, here you can only earn points for the first time each task is completed in each difficulty level until all of them have been completed.

Cheat Codes:

Fights

There are unlimited amount of fights in the game. It is possible to reach 35 by doing the following: Cut all the enforcers from the league, then place them all onto only two teams. Cut players that are not enforcers from the two selected teams. Place the enforcers on all the lines of both teams. Finally, play a game with the two teams. To increase the frequency of fights besides the frequency option, increase hitting power and decrease the fatigue options. Placing the level of skill to pro or higher makes it easier to start fights. Players may even fight just by bumping shoulders.

Top twenty enforcers

1. Rob Ray (Buf): Very good checker, has heart. His 3000+ PIM is why he is the best. He will fight anyone on the ice and is the greatest leader for your team.
2. Eric Boulton (Buf): Follows in Ray's footsteps. Have him on the same line as Ray.
3. P.J. Stock (Bos): Fights very often. Does not get called for penalty that much.
4. Tie Domi (Tor): Dirty player but can scrap well.
5. Stu Grimson: May have been forgotten, but is a power house.
6. Bob Probert: 3000+ PIM and can still fight.
7. Zdeno Chara: 6' 9" giant that can deliver punishment.
8. Jody Shelley: Plays dirty but can go toe to toe with everyone except Ray or Boulton.
9. Matt Barnaby: Not a very good fighter but will always go.
10. K. Oliwa: Big time hitter and can fight well.
11. E. Cairns: Good enforcer for a defenseman.
12. I. Laperriere: Small but powerful.

13. Paul Laus: Also very good hitter for a defenseman.
14. A. Nazarov: Russian enforcer who can deliver.
- 15 P. Worrell: Big 6' 6" enforcer who can help a power team.
16. J. Weimer: Has Eric Cairns to back him up cause he is an average fighter.
17. D. Brashear: Can go toe to toe with many players.
18. S. Mckenna: 6' 8" giant who can fight well.
19. J. Odgers: Old but still noticeable.
20. ***** bonus player: Create a player named Dan Westphal. Give him qualities all the way up to have a great enforcer and scorer. Make him as short as possible and light to make him go more often. No other created player will go as much as he does. He is great on lines with Ray and Boulton.

100 Rated Players:

To make a 100 rated RB, adjust the upper and lower body strength low enough to put all the other stats at 100. Then, fill up the remainders on your upper or lower body strength. You can do the same for a QB, TE, WR, DB, LB, DT, DE. However, for the LB, DT, DE, make sure they are big. For a DT or DE set the weight to 400 lbs. and height about 6' 0". For the LB, set the weight at about 260 lbs. and make him 6' 4".

Simple Tackle:

When on defense go to 3-4 and select "Base". When on the field, choose your outside linebacker and move him near the line scrimmage without crossing it. Once the quarterback snaps the ball, use speed burst to run around and sack him. This will work almost every time unless there is a tight end were your line backer is located.

Chapter 1 Hints:

You are first going to see Ari's mom in the kitchen talking to herself... and then Annie, Ari's little sister walks in. Both the family members start talking and then... you come in! The mom will ask you what you want for dinner but it does not really matter what you choose cuz it will always be a secret :P Then she tells you that your father has found this weird purple bottle which is on the kitchen table. You can choose one of the three different things but it still does not matter cuz it is not important. Your mother then has just remembered that she has to pick up bread for their supper and I mean, who can eat without bread! So you can choose one of the three choices but no matter what you will be the one to get the bread hahahaha! She tells you to go to the Tenel bakery. So, off we go! Leave the house and then you will have to talk to Annie so she can get out of your way! Open the gate and talk to the people you meet. The pudgy boy will tell you where Tenel village is!

and it isn't hard to find so I am sure you don't need directions. Before you go to the bakery, make sure you go visit every house cuz there could be something important like that lady on the top floor of the grocery store who tells you to go to the butchers. Also, talk to Julia who is at the entrance desperately waiting for you! Even if you ask her out or not she will have to tell you something bad later!

Cyphertext:

To get the first cyphertext you have to go to the Elder's house in Tenel. (It is the very big house) then you have to talk to him. I think it might only work if you started your journey and you defeated the 2nd boss. He will give the first one to you. When you read it all backwards it is "The circus is here let's go to the grounds" then when you go to the circus grounds there will be a "suspicious guy" there talk to him and he will give you the next one. The next one un-coded is..." knock three times on the side of town hall of the machines" then you go to the next city. on the side of town hall (when you're looking at it on the left side) go to it. The boy will have an exclamation point so you have to press X When it gives you a choice press "knock 3 times" then you get the next one.

How to find Toby:

To find Toby check every house, you'll know it's his house when you see a boy standing in front of his back door. Talk to the boy, SURPRISE! It's Toby. He'll ask you the password, it's the second to the bottom.

Get the Bishamon Sword

Fight through all 20 levels of the Dark Realm. Kill all of the monsters on the 20th level, then open the treasure box here to discover the Bishamon Ocarina. Then, in the area just beyond the second Marcellus boss fight, use the Ocarina on the bone door here to open it. Then head inside and claim the prize, a sword with unlimited magic which will kill any non-boss character in a single swipe. A powerful ally, indeed.

Beat Oni Spirits...Unlock An Arsenal

If you make it past all 12 levels of the extremely challenging Oni Spirits mini-game, you will unlock a gameplay option that will allow you to start the regular game with a wonderful array of toys. Not only do you get to play through the game with the Bishamon Sword, but you get unlimited Arrows and Bullets, and begin with 99 Soul Absorbers in your inventory. In addition, any magic you use will automatically respawn after the attack. With this at your disposal, beating the game again and unlocking everything else will be a cinch!

Unlock Oni Spirits

If you collect all 20 Flourites and finish the game, the mini-game Oni Spirits will be unlocked. For a full description of where to find each Flourite, read the Flourites section of this guide.

Unlock Onimusha 2 Trailer

Finish the game on any difficulty to unlock a sneak preview of Onimusha: Warlords 2. When you go back to the main menu after saving, go to Special Feature to view the preview footage.

Unlock the Panda Suit

If you collect 10 or more Flourites during the course of the game, and successfully finish, there will be an extra costume available for Samanosuke when you begin a new game... a cuddly panda suit! When you restart, select Samanosuke-Extra to play as the big bear. Note the daisy gauntlet and stuffed friend in the mucus pouch. Don't you love being a marsupial? During gameplay, use L2 to wear the head on or off.

All 20 Flourites

There are 20 special rocks--called Flourites--stashed throughout the game. Finding them all is difficult, but will reap great rewards. If you finish the game with all 20 Flourites, a mini-game called "Oni Spirits" will be unlocked.

The Vision Staff, which can be found near the Bishamon shrine in the West Area, is very helpful in locating Flourites. As soon as you possess it, the rare items will shine, making them much easier to spot. However, you'll have to find the first nine on your

own. Below, you'll find a list of every single Flourite in the game.

1. In one of the small alcoves with brown doors near the Seiryu in the Under Temple area.
2. Just after the boss fight in the South area, break a couple of urns and search the floor under them to find the Flourite.
3. In the Keep, after running into Kaede with Yumemaru, you'll find the Flourite in a little cupboard over the treasure box near the stairs.
4. On the upstairs level of the Keep, through the room just past the red magic door on the catwalk. Step through the next room and find the Flourite under the stairs near the treasure box containing the Arrows.
5. In the upper reaches of the Keep, you will find a Flourite across from Volume two of the Seiryu right after the cut scene where Tokichiru takes off into the night.
6. In the Keep Underground, head down the second hall of glass-encased red samurai. In the left corner (near the last samurai), you'll discover the Flourite.
7. In the Keep Underground, find a Flourite inside the iron maiden in the same room where you get the Blue Key.
In the West Area, when playing as Kaede, find the secret room (use the Gear to enter). In front of the Buddha statue here is a Flourite.
9. While playing as Kaede in the West Area, you will step into a burning room just past the gate that required the Gold and Silver Plates. Through the door left of this entrance is a narrow staircase. Next to the staircase in a heap of barrels, you'll find the Flourite.
10. In the West area, you'll find a Flourite just outside the door after obtaining the Vision Staff with Samanosuke.
11. In the West area, find a Flourite on the hill with the sled just outside the castle.
12. In the West Area, you'll find a Flourite blinking in the path on your way to the room with the statue (where you got the Matchlock).
13. In the East Area (with Samanosuke), atop the roof there is a bell. In the walkway around the bell is a Flourite.
14. While playing as Samanosuke, collect the Flourite on the pier just past the Magic Mirror room in the East Area.
15. In the East Area, just when you begin playing as Kaede, you will enter a shrine just past the locked door you pick. A Flourite is on the floor just to the right of the door.
16. While playing as Kaede in the East Area, climb a ladder in the bridge house Magic Mirror room. Destroy the crates here to find another Flourite.
17. In the East Area, while playing as Kaede, you can find another Flourite atop a chest in the room where you get the final book of the Suzaku.
18. Sixth level of the Dark Realm
19. Eleventh level of the Dark Realm
20. Seventeenth level of the Dark Realm

Alternate Costumes

If you want your character to look a little different, simply complete the game one time and then start a new game after saving. You will see a "Normal/Special" option. If you select the Special option you will appear in a special panda suit.

Onimusha 2

After you complete the game for the first time, it will prompt you to save. Do so, and then start a new game. View the "Special Report" to see a small preview of Onimusha

2, which apparently takes place about 10 years after the events in this game.

Beat world #1-4 bosses

#1 Blinky's killer frog

This boss is not to hard but he can be annoying. first when he shoots his tounge out it will swing back and forth, you need to butt-bounce on it 3 times. After your third hit blinky will make the tounge metal. Now when he spits it out you need to get on the tounge and Rev Roll into his mouth 3 times to finish him.

#2 Inky's blade-o-matic

Now bosses 2,3,And 4 will look almost the same. to defeat inky you need to dodge the blades he shoots and Rev Roll into him 2 times. After that you need to go to one of the outside platforms and butt-bounce off the b-doing over the edge, when you do that if inky is below you you need to butt-bounce on the capsule he is in 2 more times. when he shoots blades again do a rev roll, and then butt-bounce on the capsule again. if you

follow the rev roll/b-doing butt-bounce routine he'll be done in no time!

#3 Pinky's Revenge

like the last boss rev roll into pinky 2or3 times. this part is annoying you need to again butt-bounce on her capsule but the b-doings that you need to bounce off of are ALL ON THE LEFT WHEN YOU FACE THEM if you understand what I mean you will not have as much trouble because the hard part is getting pinky to get under you. If you butt-bounce on her about 2 or 3 times she will rotate back and forth from shooting snow balls at you and trying to freeze you with the smoke coming out of the bottom of the machine. hit her 2 or 3 more times to finish her. if you do GREAT!.

#4 CLYDE AND THE CALDERA

Wow. This is pretty hard! To hurt him, you have to butt-bounce the top of him. For the first part, dodge his attacks and wait for him to stop attacking. Watch out for the geysers coming out of the ground, too! Now he'll come low to the ground near one of the outer islands. Rev roll to where he is using the ledges as ramps and quickly butt-bounce on him! Repeat and you're on to his second form. To dodge, rev roll to a different island than the one he's attacking. After two assaults he hovers around the center. Wait for him to stop moving and butt-bounce! Repeat and now for his third form! The third form is just like the first form only it shoots faster and more. Do the same thing you did to beat the first form. Now for the fourth form! This is like the third form only it shoots even more times. Best way to avoid this now is to rev roll across the gaps back and forth til he stops. He'll hover near the center island in this form. When you hit him once he starts shooting out three shots. If you manage to stay alive for this he'll hover again and let him have it! Now for the final form! He's the same as always only now it's a lot pickier about where you bounce. You have to bounce directly on Clyde, the ghost piloting the thing. After you hit him once, he'll do the fire move from his second form so rev roll outta there. Once more and he's a goner. You receive the golden pear.

Increase Max Health:

To increase your maximum energy, collect six cages. You can increase your max energy 10 times during gameplay.

Hint: Double Your Points:

Try to grab gems and junk when you are wearing a special suit. The points are multiplied by two. The grapple arm suit has the longest lasting timer, so use that to maximize your score when grabbing gems over long distances, but in a pinch, any suit will do.

Hint: Look And Don't Run Too Much:

There are two bonuses you need to watch for in order to get more points - one is a blue bug that hides fairly quietly in hard to spot areas. All Rayman needs to do is look at it in first person for a while and earn points.

The second bonus is a reddish alien flower that runs away if Rayman spooks it by running, dropping, or attacking. If you manage to sneak close to it, you can earn a lot of points.

How to beat the Black Night

There is 4 switches when the Black Night is above one head smash it with square. It will shock him on every switch and he's doggone. (You must have the Football Helmet to do this

Bosses 1 & 2:

Boss 1: The first boss you should encounter is a fairly large Creeper. Since he can't be hurt you have to avoid him on the slippery floor and grab the 5 keys that are floating around [Don't worry. You can just jump to get them]. After getting all of them, head over to the end of the room and get out of there. [P.S. If you come back there the door will still be open and a 2 hit Creeper will be there to]. Boss 2: Once you get passed the 1st boss & more than a bunch levels you will finally get to the top of Mystic Manor. After seeing the cut scene with the Mastermind [the prime suspect of the game], he will disappear and then the Black Night will be on the balcony that Velma's on, but she's in a cage. When this battle begins, the Black Night will start throwing axes at you. Do your best to avoid them. If you get down to 3, 2, or 1 lives there are 3 sandwiches lying around. Use them wisely. And speaking of!

witchs there's one flying around. Since you don't have the thunder smash [unless you put the All Weapons gameshark code on] avoid her. Well anyway, when the Black Night walks past one of the 5 red switches press the square button to take out your helmet and then charge at the switch. With luck the Black Night will get shocked and now that switch will be busted. Get the Black Night shocked with all the switches and now you

have defeated him. Now jump up to the broken fence and get up to the balcony. Go to the end and then a cut scene will happen showing Scooby going on top of Velma's cage and letting her out. After watching Scooby finding Velma's glasses you'll then get the goulashes that let you get in the Cannery.

Get the Football Helmet:

To get the Football helmet go to the top of Haunted Hill

location of the springs:

It's located on pier on the pier part 2

Get to creepy crawlies in the hallways:

First go to smugglers cove then go to shock on the dock part II. There is a pile of planks near the warp gate. Do a thunder smash on it and then you will get to creepy crawlies in the hallways.

Tips for beginners:

Beginners, when you get to the place where there are 4 floors, the bottom one topples, so if you don't want the caveman to get out of the ice, simply go through the floorboard PAST the ice block and let it slide you down. this skips the fact that you will get pummeled by the caveman's club. pretty clever, huh? Also, some big enemies are able for you to head butt them (run at them) this will make them dizzy for a while but can get back to normal. But the zombies in the hedge maze, unable to head butt. sorry :(

The Hidden Plane, Shinden Parts Locations

There are a few different hidden planes in the game but one of them you have to assemble before you can use it. The four pieces that make it up are scattered throughout the Adventure Mode, hidden on alternate landing strips which you need to land at to pick them up. These landing strips are hard to find at first but once you earn the Special Radar (see special radar below) by playing through the Target Mode they will be easier to find. The following are the levels where you will find the different Shinden parts.

- Right Wing - Land at the alternate landing strip in The Adventure Begins level.
- Left Wing - Land at the alternate landing strip in The Labyrinth level.
- Body - Land at the alternate landing strip in The Towers Of Terror level.
- Jet Engine - Land at the alternate landing strip in The Great Divide level. (Once you get the jet engine you can equip the Shinden with it to turn it into a jet plane).

Swordfish Triple Wing

Hidden in the game is a third wing which when attached the Swordfish will turn it into a triple winged plane. To find the hidden wing you must land at the alternative landing strip in the level Mid-Air Rendezvous. Once you earn the Special Radar (see special radar below) by playing through the Target Mode the alternate landing strip will be easier to find.

Unlock Custom Parts

The only way to earn custom parts for your aircraft is to earn grades of B or higher in the missions in the Adventure Mode.

Unlock The pontoons

This one is simple. To earn a set of pontoons for your aircraft which will allow you to land in the water you have to complete the Stormy Seas level where you have to land on an aircraft carrier. The pontoons are necessary equipment for a mission later on in the game.

Unlock The Auto Gyro Plane

Clear every stage of the Sky Canvas Mode with a score of at least 90 Points.

Unlock The ME 262

Beat the entire Adventure Mode once (including the final level) to earn the ME 262, a very fast jet with two engines.

Unlock The Corsair

To unlock the cool Corsair you must get really good at pulling acrobatic tricks. You see you're going to have to earn enough Acrobatic points in Adventure Mode to get circles to appear around ten of your mission grades. This is quite tough however, good luck.

Unlock The Silver UFO

Complete all the missions in the Adventure Mode with an A grade to unlock the silver UFO.

Unlock The Gold UFO

All you have to do to earn the gold colored UFO is to get gold on every single mission in Target Mode.

Unlock The Stealth Jet

Complete every mission in Adventure Mode with a total time of 10 minutes.

Unlock Stuff In Target Mode

By beating the game in Target Mode you can earn medals which can be exchanged for some cool features. The following is a listing of what can be earned and how much the items will cost you.

| Item | Cost |
|-----------------|--|
| Radio | 4 gold medals |
| Music Tracks | 1 silver medal each (12 tracks total) |
| Special Radar | 2 gold medals (This radar will show the location of the hidden landing strips in the game which hold hidden parts to make the Shinden plane and where the third wing for the Swordfish is stashed. Your existing radar will be modified, no equipping is necessary.) |
| Emblems | 2 silver medals (Find the new emblems in the Customize Aircraft Mode.) |
| Unlimited Boost | 2 gold medals (Once equipped all jet planes will have an infinite amount of boost which has to recharge after every use.) |

Routes to Maximus

There are three sub-final stages before Maximus, The Valley of Fire, The Great Falls, and A Tight Squeeze. You will only see one of these stages on your route to Maximus. The one you see is dependent on what route you take through the Islands.

There are four Lost Map pieces located throughout the islands. The Lost Map pieces are located at Take the Low Road, The Labyrinth, The Ancient Forest, and Over the Falls. One of the three sub-final stages will be unlocked depending on the order you obtain the map pieces. The following is a list of the 6 possible combinations of Map Location routes to Maximus.

- A
Take the Low Road
The Labyrinth
The Ancient Forest
Over the Falls
The Valley of Fire

- B
The Labyrinth
Take the Low Road
The Ancient Forest

Rolling Body, Froggy Airhop:

To do the Rolling Body(glitch not hint), hit Jump, Grab, Jump(X, O, X). Very interesting glitch.

NOTE: This works better when you have the SLOW MOTION JUMP Thievius Raccoonus page.

NOTE2: This may not work for official version.

The Froggy Airhop is something I found out using the Rolling Body. If you hit Jump, Grab, Jump, Grab(X, O, X, O) you will jump, make a brief grabbing motion, push your feet out like a frog, and do another grabbing motion. This goes higher than the Double Jump.

NOTE: This may not work in official version.

Keyholder:

When you are unlocking a door with a Treasure Key, go to the point where you throw the key. When the keys start to turn, hit Triangle(you need to have an action on it). You should now be walking around with your hook in your right hand and a key in your left. and get) Cool little glitch.

Terrorists Weapons:

Beat the game ranked "ensign" and unlock terrorist weapons in armory.

Multiple Grenade Launcher:

"Bravo open/close door"(when close to a door--point at it with the crosshairs) "Hand up,get down" (sneak up to guards and yell it) "Breech,Bang,Clear"(clear a room by pointing crosshairs into it-your team will throw in two bang, grenades, and a frag) "Bravo diffuse bomb" (when pointing crosshairs at bomb) "Team low profile"(team sneaks around killing terrorists stealthy) "I got a gun!What do you got?"

Easy Kills:

In level 4 go prone and go under the huts and blow wholes in the floor. The enemy wont no what hit'em.

P.S. Throw a flash bang or a smoker in the window first.

P.S.S. When more enemies come after the final hut throw frags way out behind the hut while your still on it, then kill anyone who charges, then crouch and move silently around the perimeter of the back of the island and kill the surviving snipers.

Defuse The Bombs:

In the third level you must defuse 3 bombs in the allotted time. To make things easier disarm the 2 bombs close together to the north east. Then kill terrorist leader in building C. This will reset the clock. Then go for the last bomb. By the way each bomb takes a little under 30 seconds to defuse. Good Luck Commander.

MR. Pickle LEVEL:

If you want to know how to beat the level when you have to rescue Mr. Pickle, listen up. You do not have to be stealthy on this level. I armed my fire team with M60's, A silenced pistol, frags and extra ammo. When you start the level there are 2 tangos around the rock i think you know what to do. Then the alarm might go off. if not run to the beging of the bridge i know you would want to take the path under the bridge. but just go to the end of the bridge there will be an enemy at the top of the front gate take him out, then there will be an enemy a few more enemys in the arean kill them then go to the entrance of the compound on the way there take out the gaurd towers. i know that the alarm will be going off so tell bravo to hold at the entrance do not let them enter. then go set a sachtel charge done by charlie out side of the compound. when you set it tell bravo to enter the compund then you go enter. wait a minute and take out all enemys. make sure you get them all c!

ause there are 2 with MGL'S. then disable the genorater. there will be a sniper tower just next to yuo take it out. then there are 2 buildings to the right of the tower follow the wall the last building clear out the building there are 2 tangos on the 1st floor and 1-3 on the second floor the map should be on a table on the 2nd floor. take it. then go rescue MR. Pickle. tell Bravo to frag and clear the building then tell them to wait outside of the door so you don't run into any uninvited guests. when you rescue him tell Bravo to attack to foxtrot. remember the sachtel yuo set run out of the compound from the hole you made. with Mr. Pickle. then go meet up with Bravo Element. tell them to follow you to the extraction zone.

Refill your clip without reloading:

Once you kill somebody and you only have a few bullets in your clip, switch weapons with the guy you just killed and switch back, your clip is full without the cost of one clip.

Hide in plain sight:

1. Always stay in the prone position (crawl).
2. Use the surrounding foliage (trees, grass, etc.) as cover. Remember the thicker the better.
3. With all these steps in mind, plus camos, the enemy should just stroll right past you.

(HINT: These tips work better with online play. The single player enemy AI is smarter than an actual human.)

More Weapons & Smarter A.I.:

Beat the all 12 missions to get more weapons,i.e Desert Eagle, Uzi, and Grenade Launcher.

The enemies will also be smarter and better shots.

The more you play through the higher your rank will be, plus more weapons and more intelligent enemies.

Headset Commands:

"Bravo open/close door" (when close to a door -- point at it with the crosshairs)

"Hands up, get down" (sneak up to guards and yell it)

"Bravo diffuse bomb" (when pointing crosshairs at bomb)

"Breech, Bang, Clear" (clear a room by pointing crosshairs into it - your team will throw in two bang, grenades, and a frag)

"Team low profile" (team sneaks around killing terrorists stealthy)

"I got a gun! What do you got?"

Hint: Mission 2:

At the beginning, tell your men to hold their position and go to the right, up the hill. Stay to the left side of the hill while ascending it. You will see an enemy fairly soon in the mission. Quietly and carefully snipe him. There will be another one very shortly after the one you just killed. Continue on the cliff and you will reach a drop off to another cliff. Jump down. Walk slowly to the edge or close to it until you can see the small cabin. Snipe the man standing outside quickly with one or two shots. Then, tell your men to regroup after you jump down from the cliff and go to the cabin. There will be one or two men inside -- kill them quickly. Keep moving north -- that is where all the action is located.

Objective 1: You will find the Intel in the big place with the bridge-type object on the third floor. It is in the laptop.

Objective 2: The weapon caches are the boxes stacked on top of each other. Put C4 on those and that will do the job.

"My Day At Work"

To view this short slideshow enter the code screen from the options menu then enter:
JAMEZ

Once you enter the code you will be taken immediately to the slideshow. Once it's finished you'll be taken back to the code entry screen.
submitted by cmunsta1

Hidden Christmas Video

Enter the Options Screen from the Main Menu and then enter the Codes Screen. Now enter:

WOZ

into the code screen. When done correctly you'll be automatically taken to a hidden movie where Nym is trying to open a door and when he knocks it in, a freaky guy pops out wishing everyone a Merry Christmas.

Jar Jar Mode

Enter the Option Screen from the Main Menu and then enter the Codes Screen. Now enter:
JARJAR

into the code screen. The message Jar Jar Mode will appear at the bottom of the screen and when you go to play a mission the pilot controls will be reversed making it nearly impossible to fly around. Once you see how much it makes the game suck you will want to return to the Options Menu and restore the games default settings.

View Hidden Picture

At the code entry screen enter:
SIMON

You'll be shown a picture of the LEC team.

Unlock Experimental N-1 Fighter

At the code entry screen you can enter:

BLUENSF

You can now go to the Bonus Missions and notice that another ship will be added to the list of ships. You will not be able to select the ship unless you do the following:

Enter the OVERSEER code; or

Beat the game and earn Gold on every mission.

You can then return to the Bonus Missions menu and toggle the Experimental N-1 Fighter on.

The ship will be a blue Naboo Cruiser (police cruiser). It will come with Flak Missles which when fired will travel ahead of the targeted enemy and then explodes. It's a highly effective weapon. Especially if you have a swarm of bad guys. You could fire one of these missles into the swarm and destroy a bunch with one shot.

submitted by cmunsta1

Invincibility

Is the game too tough for you? Well if you're having difficulty all you have to do is enter the following cheat code into the Code Screen found in the Options Menu. At the Code entry screen enter:

MINIME

and if you do it correctly the word Invincibility will appear at the bottom of the screen. Now go back and play any mission without worry of destruction. Whimp!

Unlock Everything

Enter the Options Screen from the Main Menu and then enter the Codes Screen. Now enter:

OVERSEER

You will unlock everything in the game excluding the bonus multi-player levels.

Director Mode

To enable another completely useless cheat mode go to the Code Screen and enter:

DIRECTOR

If you do it right the words Director Mode will appear at the bottom of the screen. When this mode is active whenever you play a mission the camera will jump around to different ships other than the one you control as well as shoot the action from far off drop camera positions. It is impossible to finish a mission with this mode on. You can change cameras to a limited degree using the SELECT button. Sometime R1 will let you zoom in on the action. Entertaining for about five minutes. When you've had enough quit and return to the Options Menu so you can restore the game to the default settings.

Dr. Strangelove

Chris Corry (Lead Programmer) managed to program himself into the game and give a head-nod to the classic movie Dr. Strangelove. In the bonus mission Charm's Way as you approach the SECOND missile frigate, two escape pods will be launched from it. If you highlight them, one of them will be called the "ChrisCorpedo". If you fly close enough to it you'll see an android riding the escape pod like a bull and waving his hat in the "air".

Hidden Message

Enter the code entry screen and enter:

LTDJGD

This will present you with a hidden message placed there by a crafty programmer to say hello to his two boys.

submitted by cmunsta1

No Heads Up Display

Enter the Options Screen from the Main Menu and then enter the Codes Screen. Now enter:

NOHUD

If you entered the code correctly.

Unlock Multiplayer Mode

Enter the Options Screen from the Main Menu and then enter the Codes Screen. Now enter:

ANDREW

This will instantly unlock the Multi-Player Mode.

Beat Essara and come in first to get gold.

Unlock The Outpost Attack Bonus Mission

To play the Outpost Attack Mission you must get Bronze in all 14 missions of the normal game. The mission consists of defending an outpost from swarming droid fighters. It is a timed land based mission where you lose points for losing buildings and gain points for destroying droids. Medal ranking depends on the score you get.

Unlock The Space Sweep Bonus Mission

To play the Space Sweep Mission you must get Silver in all 14 missions of the normal game. In this bonus mission you basically get to play 3D Asteroids. Rescue On Solleu

The Final Assault

Unlock Darth Maul's Infiltrator

To be able to play the hidden two-player games you must first beat the normal game on any difficulty level. Getting bronze silver or gold in the missions is not necessary to unlock the two-player missions on the Bonus Missions Screen. Unfortunately once unlocked in you must still get gold in every level of the normal game to play the bonus level. In the Canyon Race Bonus Level you and another player race down the canyons of Naboo using a split screen.

Unlock Two-player Capture The Flag

To be able to play the hidden two-player games you must first beat the normal game on any difficulty level. Getting bronze silver or gold in the missions is not necessary to unlock the two-player missions on the Bonus Missions Screen. Unfortunately once unlocked in you must still get gold in every level of the normal game to play the bonus level. In Capture The Flag you and a friend battle it out in the skies of Naboo. Rules follow basic Capture The Flag rules where players try to steal an opponents "flag" and return it to their own airspace.

Start With Every Spell

At the title screen press and hold R2, then enter:
CIRCLE, SQUARE, CIRCLE, TRIANGLE, CIRCLE, TRIANGLE.

You will hear someone say "I Gotcha". You will then have every spell.

Spell Time Saver:

When you need to cast a spell, such as healing and you are in a battle, Cast the spell, go into your inventory while it's casting and then come back out. The spell has already been cast and you don't lose any time by casting it

Easy EXP:

To get easy EXP. for Joseph and Flece, just listen to this...After you get through the palace for the FIRST time, go outside of Lenele City. Then, explore the entire world map. Afterwards, you will see a volcano on the screen. Walk up the part where the volcano is curved inwards. There, you will fight "Red Oni"s. They are pretty easy, but can prove themselves worthy of fighting you... They give over 5000 EXP. each time. I found this very useful later on in the game. By the way, I know this works because I already have all 8, that's right, 8, of the rings. Good Luck!

Extra Bacite Tails:

Try to have an encounter with some bacites. Kill all the bacites in site(or all of them at all.) Go to a yellow line(or exit line). Say no when it asks if you want to go to the worldmap. Turn around and start walking strait. Soon bacites should turn up. If you keep doing this you can get at least 20,000 to 100,000 gold pieces!!!

Alternate weapon view:

Press Select + Right during the game.

Axel:

Go to the Freeway level. It is recommended that you destroy all but one or two of the other vehicles before proceeding. Toward the center of this level is a large construction site with two big cranes. The one on the right is holding a pipe, the one on the left is holding a crate. Use the ridge between the cranes and the road and aim yourself at the control box of the left crane (at the center box). You only need to hit it once with some kind of missile. The crate will then lower into the construction yard. Shoot it open to unlock Axel.

Man Slaughter:

Once the ship docks on the island in the Prison Passage level and you can exit the boat, go to the right (left if facing the ship). Follow the waterline until you reach some crates. Shoot them up until a ramp is formed. Shoot the side of the ship until a opening appears. You will unlock Man Slaughter there.

Minion:

Unlock all the secret characters, then complete the game in story mode with all of the characters. A FMV sequence showing Minion reassembling and a "Beware of Minion" message will appear. He appears after Sweet Tooth on the character select screen.

Warthog:

Begin the Suburbs level and go to the entrance to the carnival. Turn left and jump off a hill to land on top of a building with a structure on top of it. Blow up the structure to reveal a hole in the building. Fall through the hole and destroy the panel. A message will say Warthog has been unlocked.

Yellow Jacket:

Play the Junkyard level and shoot down the airplane that circles around. A fire missile will do the job, as long as the jet is the only thing in view. The jet will catch on fire, circle, and crash into a wall in the lowest area of the level, that leads to a underground tunnel. The suspended crate's opening faces this area. Follow the tunnel under the sewers, collect the weapons and health, and continue until you see a control panel attached to a large column in the middle of a circular room. Shoot the control panel and a message stating Yellow Jacket has been unlocked will appear. Yellow Jacket will appear inside the destroyed column.

Elevators level:

Start the game on the Highway Loop level. Make sure that there are no more than one or two enemies remaining. Go to the bridge with the gap in it. Go to the side opposite the long tunnel. Facing away from the bridge and to the left on the other side of the wall, you can see two round towers at what seems to be a powerplant. Hit the one closest to the bridge with a gas can. It will pop off and start rolling toward the bridge. Make sure you and none of the enemies are in its path or it will break. It will slowly jump the bridge and will make a hole just inside the tunnel. You will find the cube inside.

Freeway level:

Start an endurance match in the Snowy Roads level. Get ten kills in a row without dying.

Power Plant level:

Head to the end of the Snowy Roads level with the longer building. Face the drop and head to the left side of that gap. Slowly roll over the edge, and there should be a lower level with the cube on it.

Prison Passage level:

Select a pacey car. Do the exact same thing to unlock Warthog (see above), except do

not go in the hole in the building. Instead, drive to the end of the row of the buildings going to the left. Then, go to the building opposite that, which has a flat roof. You can do this by driving to the left edge and facing the building. Turbo and jump when you get to the other edge. Make sure to brake when you hit the roof. After this, turn to the building that is next to you and blow up the vent on the roof. You should see the black cube after the vent is destroyed. Turbo and jump when you get to the edge to get the cube and unlock the Prison Passage level.

Prison Ship level:

Get fifteen endurance kills in the Junkyard level to unlock the Prison Ship level in multi-player mode.

Put strongest character first (most lp, shield pref. w/ slash evasion etc.) mainly the guy (or gal) w/ most lp.

Keep main character in the back. once he/she/it is dead, the game is over!

Attacks don't have to happen in order! use recovery spells or any other turn first, save the one's you want to comb. This let's the enemy use up its turs, making combos easier to pull off.

Don't waste weapon endurance on weak enemies. Just melee 'em death.

Get in the habit of saving before every mission.

Upgrade weapons etc. at blacksmith using mostly materials the item is made of. don't let ED get to high or item will lose abilities.

New engines

One little tip for this racer is to play through the Time Attack mode before tackling the Championship races.

Each country in Time Attack will reward you with an engine for one of the three initially selectable buggies. By completing the three races per Time Attack (Uphill, Downhill, and Flat) you will gain a new engine that will up the stats on your buggy, which will help a lot throughout the Championship mode.

Start off in a race quicker

Here's a cool little trick that is actually pretty common in many racing games. When the clock is counting down from three at the beginning of the race, you can get a small turbo boost if you wait to press X until clock strikes one.

Hidden Area:

Find the wall that appears to be cracked, and Irish whip your opponent into it. The wall should break away, and you have a hidden area.

Areas to use:

1. Training room- run your opponent into the cracked wall two times and then you will be able to run him into the locker, and shower.
2. Parking lot- you can use the motorcycle and forklift to injure your opponent. Run your opponent into the metal fence, Volt boxes on the wall will then be exposed so you can run your opponent into it.
3. Times square- You have to buy the area. You also can climb the ladder on the helicopter and jump off onto your opponent or car. You can also climb the arena.

Get out of Elimination Chamber:

Get in the Elimination Chamber with 2 players. Have your 2nd player climb up the chamber walls and position himself above a glass chamber where the other opponents wait to get into the match. Once he is up there, get on the turnbuckle closest to him. Then just jump at him using a diving attack and you will end up outside of the chamber and you will be able to run around all over the arena as if it was a regular match. (If you don't end up outside, just keep trying, it will eventually work). Also, if you want a friend to join you outside, just have him get on the turnbuckle and try to jump at you from inside, (but make sure that you are standing right behind the glass chamber outside, closest to the turnbuckle that they are standing on). You could repeat this process to get even more opponents outside.

Treadmill trick:

In the locker room, walk onto the treadmill and press SQUARE to start using it . now press x really fast, and you will get a special quickly

Unlock Credits:

All you have to do is beat season mode once.(It doesn't matter how many times you win or lose.)

Easy Wins:

To Get a Easy Win in Here Comes The Pain You Go out side of the ring and go to the side of the ring by the ramp go to the middle of it and press square to get a table then get into the ring and go to a turn buckle and walk to it while walking to it press square to slant it on Hint: do it fast or the reff will take it . then run to it and the other wrestler will trough you into it he will be disqualified and you win the match this will take a few trys. Hint: this also works in season tag TEAMS AND SINGLES MATCHES it wont work in a none DQ match.
